- BR v4r0909p1
- BR v4r0909p2
  - run with calibs for CAL and TKR
  - should have had 4-range CAL read-out
- BR HEAD
  - reads anc data from run #700000509 (for Heather, not for me!)
  - CalXtalResponse should now have the patches for 4-range read-out
  - xmlGeoDbs with a close-to geo of the tiles, but
    - AcdRecon was running for sims before, now crashes with “Failed to get geom for a tile 100 /1/1/40/0/0/0”
