Data Handling Working Group

❑ **Pipeline II**

– **P-II server is successfully executing the GRT5 prototype Level1 task.**

• **Uses ~40 subtasks to process 15-minute tarball of NRL data (250 datagrams per chunk ➔ ~10K events)**

• **No (run-related) absolute paths in task XML or batch scripts!**

❑ **Databases**

– **Major progress on using Java stored procedures in Oracle.**

– **New schema for data catalog.**

– **Prototype web interface for data catalog.**

❑ **Beam-Test data delivery:**

– **No issues reported (so it must be working OK?).**

– **Awaiting move to CERN.**
