ISOC CHS Update

- Managing CHS software installations (Steve T)
  - Adapting Online-style RPM techniques to control centralized network installations of the CHS "platform" and code.
- Mission Planning (Bryson)
  - Interfaces to command database and orbit event/contact database complete.
  - Activity-tracking tables and interface in work.
- Trending (Mila)
  - Attempting to import information from calibration XML products into the calibration-trending tables.
  - Need a time-based (rather than run-based) identification for some types of calib data (ACD?).
- End-to-End Test 1 preparations continue
  - part 1 sched for 28 Nov, part 2 for mid-Dec
  - LICOS script developed to exercise some commands not yet tested on the LAT (Mila).

Schedule Update

- *Nov 28*   *ETE1 (1ˢᵗ End-To-End test)*
