

Crowd, Confluence & JIRA Outage June 13, 2012

Crowd, Confluence and JIRA will be unavailable Wednesday June 13, 2012.

1. Crowd and JIRA from 6:00 PM - 7 PM PDT.
2. Confluence from 6:00 PM - 9 PM PDT.

During the outage all application and database servers used by these applications will be rebooted in order to load a new kernel which addresses security vulnerabilities. The outage for Confluence will be extended so Apps-Admin can perform system administration maintenance work. Confluence will be intermittently available and should be considered unavailable.

Please send comments or questions to apps-admin@slac.stanford.edu.
