code/tasks v3r8p3:

No longer necessary to let pipeline drain before upgrades. Multiple version can run concurrently.

Added TkrReport task

If some recon chunks fail, don't redo the ones that succeeded

Split recon into many TPs to give finer rollback granularity

Longrunning TPs run on glastdataq

Simplified data directory structure

Better automatic cleanup after recon failures

More sharing of wrappers between TPs

Make .htaccess files to prevent HTTP downloads of ROOT files

Delete .evt, .pkt, and some RECON.root files after they are used

Raise recon chunk size to take advantage of new LSF queue limits
