

# Klystron Control and Energy Management

This is the homepage of the high level aspects of the software system for Klystrons and energy management (eg LEM). These are concerned with the proper configuration and control of the Radio Frequency (RF) systems used to accelerate beam bunches, and therefore is central to the function of the SLAC accelerator complex.

## Meeting Minutes

2007-02-09: Meeting re SCP support of EPICS Klystrons (see child page below)

2007-01-26: [WoodleyLCLSLEMNotes.txt](#)
