

svac reruns 20050503

The following runs were deleted from GINO's DB:

135001500 135001501 135001503 135001504 135001461 135001466 135001467

for tasks:

configReport-v3r1p10 digiReport-v3r1p10 digitization-v3r1p10 online-v2r1p1 recon-v3r1p10 reconReport-v3r1p10 svacTuple-v3r1p10 updateELogDB-v3r1p10 (some run/tasks combinations in that table are actually empty)

and online-v2r1p1 was resubmitted for all of them. This was necessary because the ldf.fits file had not been correctly picked up the first time they were run thru.
