

26 June 07 GCR Meeting Notes

- Status of GCR calibGenCAL version (Zach, [pdf](#))
- Fred:
 - Addition of quenching into simulation will start in about 3 weeks when Claudia returns.
 - Requires mods to create "position hits" in CAL for heavy ions only
 - Supposedly easier given changes in GLEAM code
- ◦ We need to discuss details of "pipeline" calibration running early in flight
- Next meeting 24 July (hopefully EVO!)
