

2008-04-01

The Data Handling Group met on March 28, 2008

Oracle Database Update

- Pipeline server is capable of handling 2000 running jobs with no other DB load
- Adding Trending Ingest causes 'commit' operations to slow down
 - SCCS has a couple configuration changes that may solve this
- SCCS takes the machines today for fail-over configuration and testing
 - We will continue to apply load for them during this process
- Installation 4/8/2008 if all goes to plan

Upcoming CCB action requests

- The following are currently installed in DEV in anticipation of release to PROD
 - Pipeline Client 1.0.2
 - Pipeline Server 1.0.1
 - Pipeline Front End 2.5.1
- [Details](#)

Infrastructure "Expert Shifts"

- Discussion of "how,who,when" is ongoing
- Goal is to have a go-to person (for emergencies) available 24/7 who is capable of fixing a problem or assessing it and contacting the expert who can.
