Data Handling Working Group

❑ **Pipeline II**

– **Demonstrated execution of complex task-chain, with interdependencies on subtasks.**

– **Web front-end now renders a graphical diagram of the pipeline configuration.**

– **PII developers met with PI operators to get feedback on the new architecture.**

❑ **Databases**

– **Demonstrations of web-based Oracle server monitoring software, and webapp-development framework.**

❑ **Beam-Test data delivery:**

– **Successfully received and processed a run from Pisa.**
