

# Pipeline 2 User's Group

Updates from last week

- › Continuing discussion on metadata content, location(s), and tools needed. Will meet tomorrow in place of DataHandling meeting to discuss further. This topic may get delayed as Service Challenge pipeline and dataset generation activities compete for time.
- › SC readiness: gtobssim pipeline2 task mostly functional. An outstanding issue concerning batch username and allocation group pending solution prior to launching first 1-year test task.
- › Have decided that first 1-Day Service Challenge Glean run will use Pipeline 1, and are gearing up to start background generation next week.
- › Confluence area:
