

Proposal for future F2F meetings

- ❑ **GLAST Collaboration Meeting at GSFC, 3/2007, is the natural goal for our work**
 - require a F2F meeting before to understand the status and guide common effort
- ❑ **Option 1 – meet around GLAST Science Symposium, SLAC February 5-8 2007**
 - most people will be around BUT
 - it's quite far from now
 - schedule is tough because of many satellite meetings
 - only possible dates to avoid overlaps are 9-10 february (friday+saturday)
- ❑ **Option 2 – meet end of January**
 - only reasonable dates to have enough spacing between holiday break and GLAST Symposium is 22-23 january
 - Europe would be first option because majority of people live there – Bari volunteered some time ago
- ❑ **Proposal**
 - Meet on February 9 at SLAC (full day) for few status report presentations and mostly organization of the remaining effort
 - Rely on our regular VRVS meetings but improve the following:
 - schedule regular time slots for open discussion like we do in workshops
 - schedule special extra VRVS meetings close to SLAC rendez-vous
 - update more regularly C&A group to get their opinion/suggestions
