

# GSI Test Preparation and discussion

- Operations plan with GSI agreed
  - Few AI still open but should be straightforward
  - Presence of people confirmed
- CU test
  - Testing multiple trigger engines
  - CNO trigger
    - Threshold identified and varied
    - calibration to be performed
    - New CU support on wheels from INFN (gave up GSI table)
  - Periodic trigger
    - In contact with DAQ team to verify periodic trigger + other trigger engines
    - Varied prescaling factor
- Offline Software
  - TKR GCR recon status?
  - CAL GCR recon status?
  - Simulation
    - Define list of MC runs?
