# GSI Test Preparation Status

❑ **CU test**

– **multiple trigger engines implemented and tested**

– **Data at SLAC**

– **CNO trigger**

– **Threshold set at ~8mip for 2 tiles**

– **calibration to be repeated at GSI with beam**

❑ **Shipment plans**

– **Close CU tomorrow, prepare hardware by Friday, load and ship next monday**

❑ **Working on run schedule**

– **GSI confirmed that we can change rate and focus easily so we can be fairly flexible**

❑ **Offline Software**

– **New BTRelease with new TKRRecon and GCRCalib for CAL before run?**
