# Event classification

Score

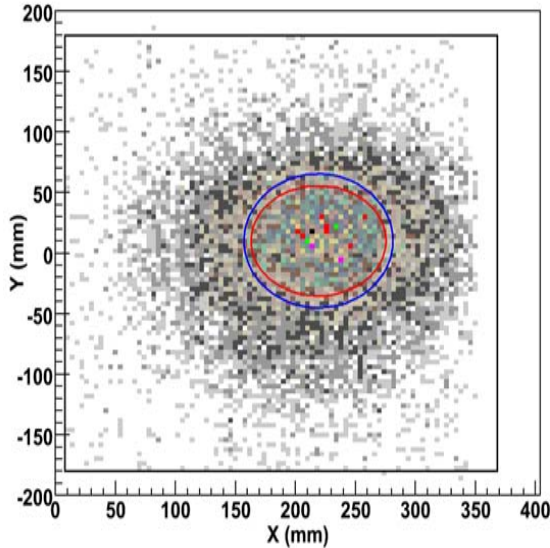

- **Class A: events with 1 vertex**
  - **Class A.1: events with 2 tracks**
    - **Class A.1.1: CalCslRLn > 6**
      - Class A.1.1.1: First two top TKR plane as Veto **New**
  - **Class A.2: events with 1 track**
    - **Class A.2.1: CalCslRLn > 6**
      - Class A.2.1.1: First two top TKR plane as Veto **New**

Score

The CU has been used as standalone detector  
Level 0 Cut: CalEnergyRaw > 0

# Systematic due to Beam dispersion

Tower 2 - Tagged Gamma Beam at Normal Incidence (0.5 GeV Electron)

Tower 2 - Tagged Gamma Beam at Normal Incidence (1.5 GeV Electron)

Tower 2 - Tagged Gamma Beam at Normal Incidence (1.0 GeV Electron)

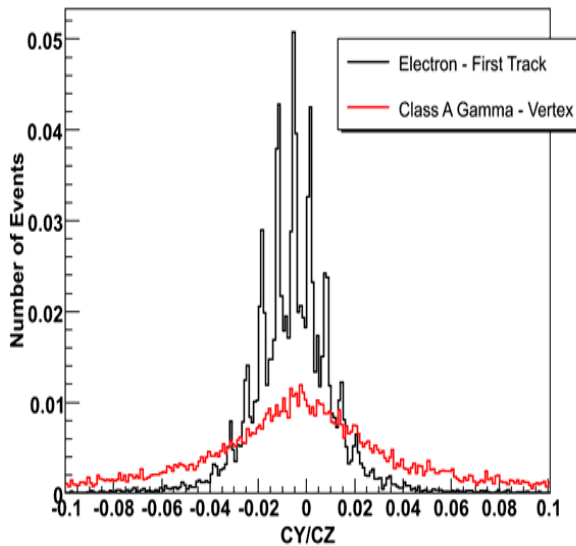

Tower 2 - Tagged Gamma Beam at Normal Incidence (2.5 GeV Electron)

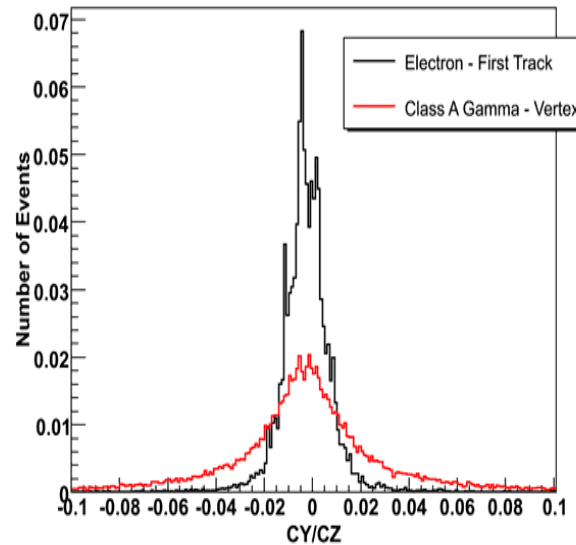

- **Blue ellipse:** electron beam spot at 1 sigma
- **Red ellipse:** Class A gamma vertices spot at 1 sigma
- **The beam divergence increase as the electron momentum decreases.**
- **The systematic error due to beam dispersion is energy dependent**

# Beam dispersion

Tower 2 - Tagged Gamma Beam at Normal Incidence (0.5 GeV Electron)

Tower 2 - Tagged Gamma Beam at Normal Incidence (1.0 GeV Electron)

Tower 2 - Tagged Gamma Beam at Normal Incidence (1.5 GeV Electron)

## Electron data

- **0.5 GeV: 14 mrad**
- **1.0 GeV: 9 mrad**
- **1.5 GeV: 7 mrad**
- **2.5 GeV: 4 mrad**

## PSF systematic is:

- **0.23 deg for 2.5 GeV electron beam (Full brems)**
- **0.40 deg for 1.5 GeV electron beam**
- **0.52 deg for 1.0 GeV electron beam**
- **0.80 deg for 0.5 GeV electron beam**

# Configurations

- **Normal incidence**
  - Tower 2: all gamma runs (both full brems. and tagged) have been used at 0° **with 2.5 GeV electron beam**. The pion contamination has been rejected by requiring the X Vertex position in Tower 2 ( $V_{txX} < 350.$  )
  - Tower 3: all gamma runs (both full brems. and tagged) have been used at 0° **with 2.5 GeV electron beam**
- **30°: all gamma runs (both full brems. and tagged) have been used at 30° with 2.5 GeV electron beam**
- **48°: all gamma runs (both full brems. and tagged) have been used at 50° with 2.5 GeV electron beam**
- **MC at normal incidence on Tower 3 with 2.5 GeV electron beam**

# PSF at 68% - Tower 2 at 0 Deg

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# PSF at 95% - Tower 2 at 0 Deg

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# PSF 95% to 68% ratio – Tower 2 at 0 Deg

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

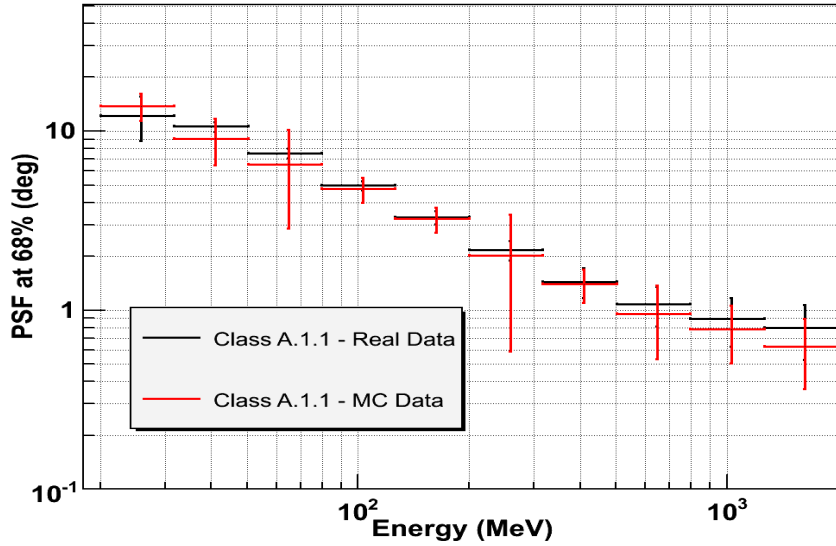

Tower 2 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# Tower 3 Data-MC at 0 deg: PSF 68%

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

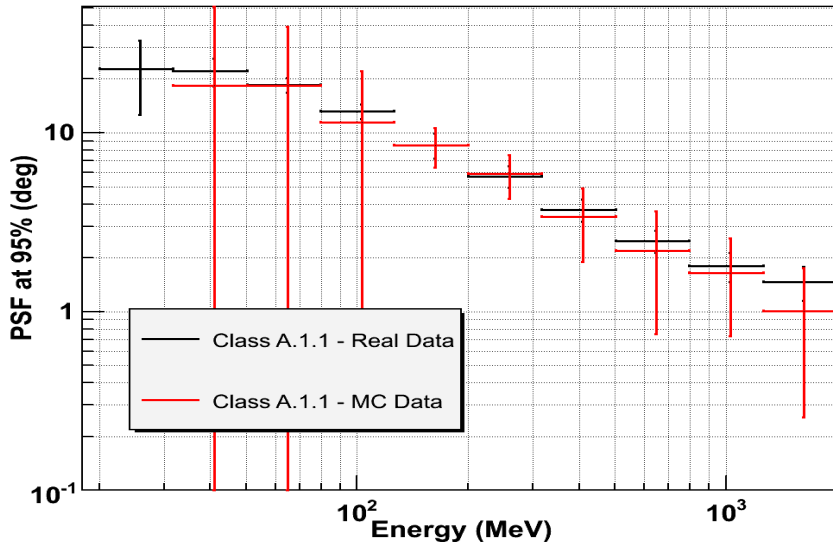

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# Tower 3 Data-MC at 0 deg: PSF 95%

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# Tower 3 Data-MC 0deg: PSF 95% to 68% Ratio

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

Tower 3 - Angular Resolution Vs. Reconstructed Energy at Normal Incidence (2.5 GeV Electron beam)

# Conclusion

- Despite the MC sample is poor and even though there is a disagreement in TKR hit distribution, the MC PSF behavior reproduces data.
