

Bari analysis summary

- **The real data and the MC predictions have been compared using the previous and the current releases**
 - The TKR hits have been studied in the whole TKR in the front TKR (plane > 12 , thin planes) and the back TKR (plane ≤ 12 , thick and light planes) in the SPS electrons runs (Nicola)
 - The discrepancies of the TKR hit profile have been evaluated (Claudia)
 - The TKR hit profile have been studied in the PS gamma runs (both full. brems. and tagged) (Monica)
- **The discrepancies are still of about of 20%**
