# BeamTest Pipeline

---

- **It mostly works**
  - **Can't merge results from parallel recon yet**
    - **probably because I'm using wrong version of ROOT**
- **Currently copied/modified from SVAC I&T pipeline**
  - **Maintenance will be a hassle**
  - **Would like to share code with SVAC pipeline when possible**
- **Uses BeamTestTuple instead of SvacTuple**
  - **Built into BeamtestRelease**
  - **Not tested in pipeline yet**
- **Custom TestReport?**
  - **Current one works**
    - **with ROOT 4**
- **Custom ConfigReport?**
  - **Current one works**

# Questions

---

- **Which runs to recon?**
  - What particle types will be used?
  - Or use <offline> tag in rcReport
  - Charge injection?
- **Geometry?**
  - Will it change?
  - Test runs while assembling?
