

Software Workshop

Like last collaboration meeting, we would like to have a software workshop at the next meeting. This workshop would be for:

- Discussions:
 - Setting priorities
 - Discussing particular implementations.
- Help, Debugging, Coding:
 - Working on particular projects
 - Help with debugging/fixing/implementing code.

What do you hope to get out of the workshop?

Software Workshop

Should we have the workshop:

- The weekend before (June 14 & 15)
 - Not so many collaborators can make this time.
- After the HPS meeting.
 - CLAS collaboration will distract some.
- Both before and after?

Collaboration Meeting

Software Session at the Collaboration Meeting.

2:30 shared with MDC.
