PingER

Ping end-to-end reporting

Projects

Atendees:

- Bebo White (SLAC-US)
- Claudio Santos (UFF-BR)
- Joao Rulff (SLAC-US)
- Les Cottrell (SLAC-US)
- Renan Souza (UFRJ - BR)

Topics discussed:

- Impala has all PingER data and is accessible from outside SLAC using JDBC;
- Investigation on tools that provide interactive visualization. (Check with one of Luiza's students);
- Maybe try a non-relational database to store PingER data;
- Thoughts on how we can make the Data Warehouse work with Nanocubes;

Topics discussed:

- Possibility to generate visualizations to mobile devices.

Next topics

- How to collaborate when Joao is back in Brazil;
- Feedback on current speed of queries;
- Try to come up with more concrete examples of what we can do with PingER data.
- Try to brainstorm about new kinds of visualization on PingER data. (Marcos)

Next meeting

- Tentatively set for Thursday, 8/25/2015: 4PM SLAC/8PM Rio
