

Charge to HPS Review Committee (18 January 2019)

In light of the time lapse between the commissioning and scheduled physics run, evolution of the collaboration, and the detector upgrades, the readiness of HPS for operations should be ascertained. The review should cover the following components that are essential for a successful physics run and subsequent results:

1. SVT detector upgrade,
2. Trigger hodoscope upgrade
3. SVT DAQ,
4. TDAQ and DAQ integration
5. Software
6. Analysis capabilities, and
7. Staffing of the collaboration.
