

# User Training for Synchrotron Experiments at SSRL in the Remote World

Sam Webb

January 2021

Remote Access Working Group

**BOLD PEOPLE. VISIONARY SCIENCE. REAL IMPACT.**

Stanford  
University

# Training —

- Training users (data collection and analysis) has always been important
- Remote access brings new challenges (opportunities)

2019	
17-21 June 2019	<a href="#">Ultrafast X-ray School (UXSS) (CFEL)</a>
17-28 June 2019	<a href="#">US Particle Accelerator School (U New Mexico)</a>
3-4 June 2019	Time- and Space-Resolved X-ray Absorption Spectroscopy (XAS) at SSRL: Analysis of Large Data Sets
5-10 May 2019	RapiData 2019
20-22 Feb 2019	SSRL Resonant Inelastic X-ray Scattering with Hard X-rays Workshop
2018	
13-17 August 2018	<a href="#">SSRL EXAFS School</a>
16-18 July 2018	<a href="#">SSRL X-ray Scattering School</a>
24-28 June 2018	<a href="#">Ultrafast X-ray School (UXSS)</a>
22-27 Apr 2018	RapiData 2018
21 Mar 2018	Sample Environments for X-ray Photon Science
2017	
11-15 Sep 2017	7th International Conferences on Hard X-ray Photoelectron Spectroscopy <a href="#">↗</a>
19-23 Jun 2017	SSRL EXAFS/Imaging Summer School
12-15 Jun 2017	Ultrafast X-ray Summer School in Hamburg <a href="#">↗</a>
5-7 Jun 2017	canSAS-IX meeting, San Francisco <a href="#">↗</a>
16-21 Apr 2017	RapiData 2017 at SSRL
2016	
26-27 Sep 2016	Scientific Opportunities for Ultrafast Hard X-rays at High Repetition Rate: An Energy Upgrade of LCLS-II
21-24 Aug 2016	12th International Conference on Biology and Synchrotron Radiation (BSR)
18-22 Jul 2016	EXAFS 2016 - SSRL Summer School on Synchrotron X-Ray Absorption Spectroscopy
21-23 Jun 2016	SSRL X-ray Scattering School
16-17 Jun 2016	Research Opportunities in Photochemistry, Solar Energy & Advanced X-ray Methods
12-16 Jun 2016	Ultrafast X-ray Summer School (UXSS)
24-29 Apr 2016	RapiData Course on Data Collection and Structure Solution
19-22 Apr 2016	Crystallization: Focus on Micro and Nano Crystals and High Throughput Methods
28-30 Mar 2016	Small-Angle X-ray Scattering and Diffraction Studies

- In person, lightsource sponsored “schools” and “short courses” have a long history at many institutions
- Benefit of combining in-person lectures with hands-on sessions to give users real-life synchrotron experiences

## “Summer Schools”

Traditional method of instruction and dissemination of knowledge

## SSRL Summer School on Synchrotron X-Ray Absorption Spectroscopy

Tuesday, September 8 – Thursday, September 10, 2020

Synchrotron Spectroscopy and Imaging Summer School

SSRL First Virtual Summer School:  
800 registrations!

Parallel data analysis sessions had  
250-300 each.

YouTube channel has 100+  
subscribers

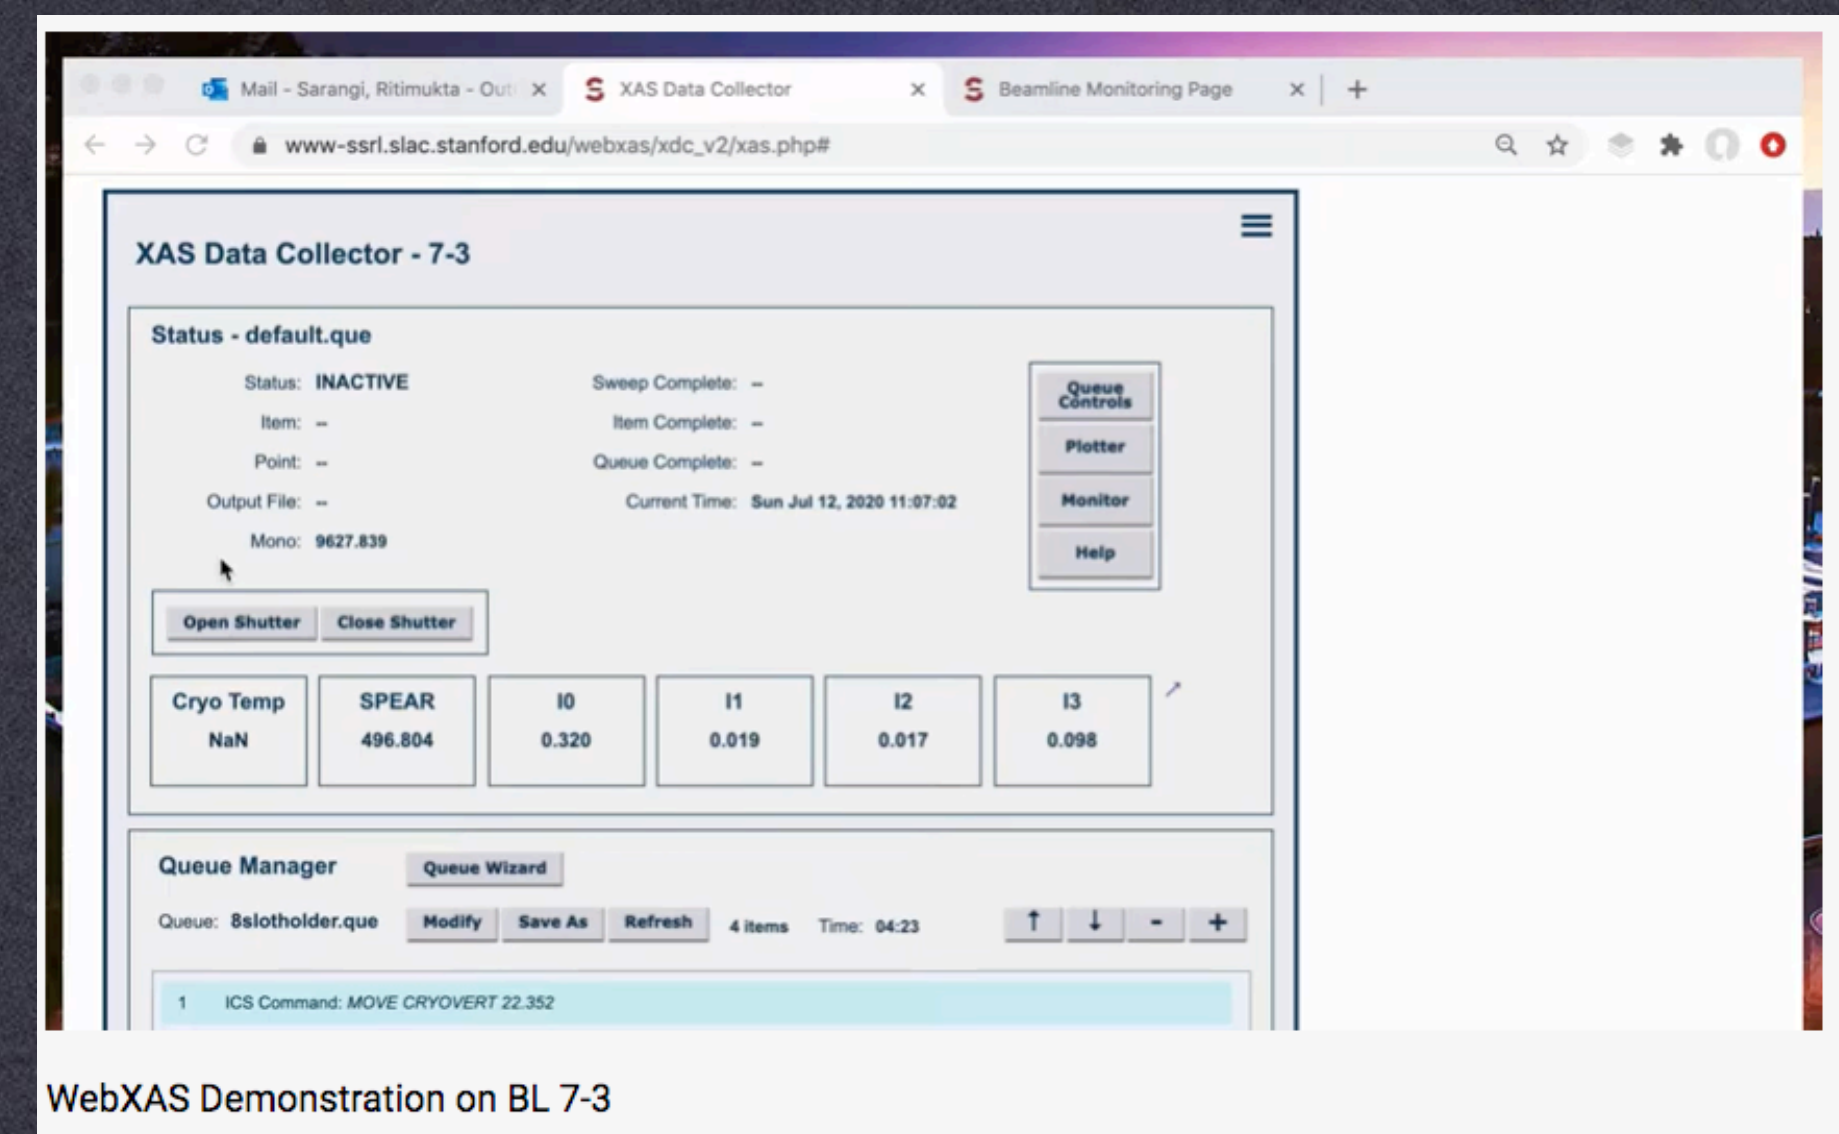

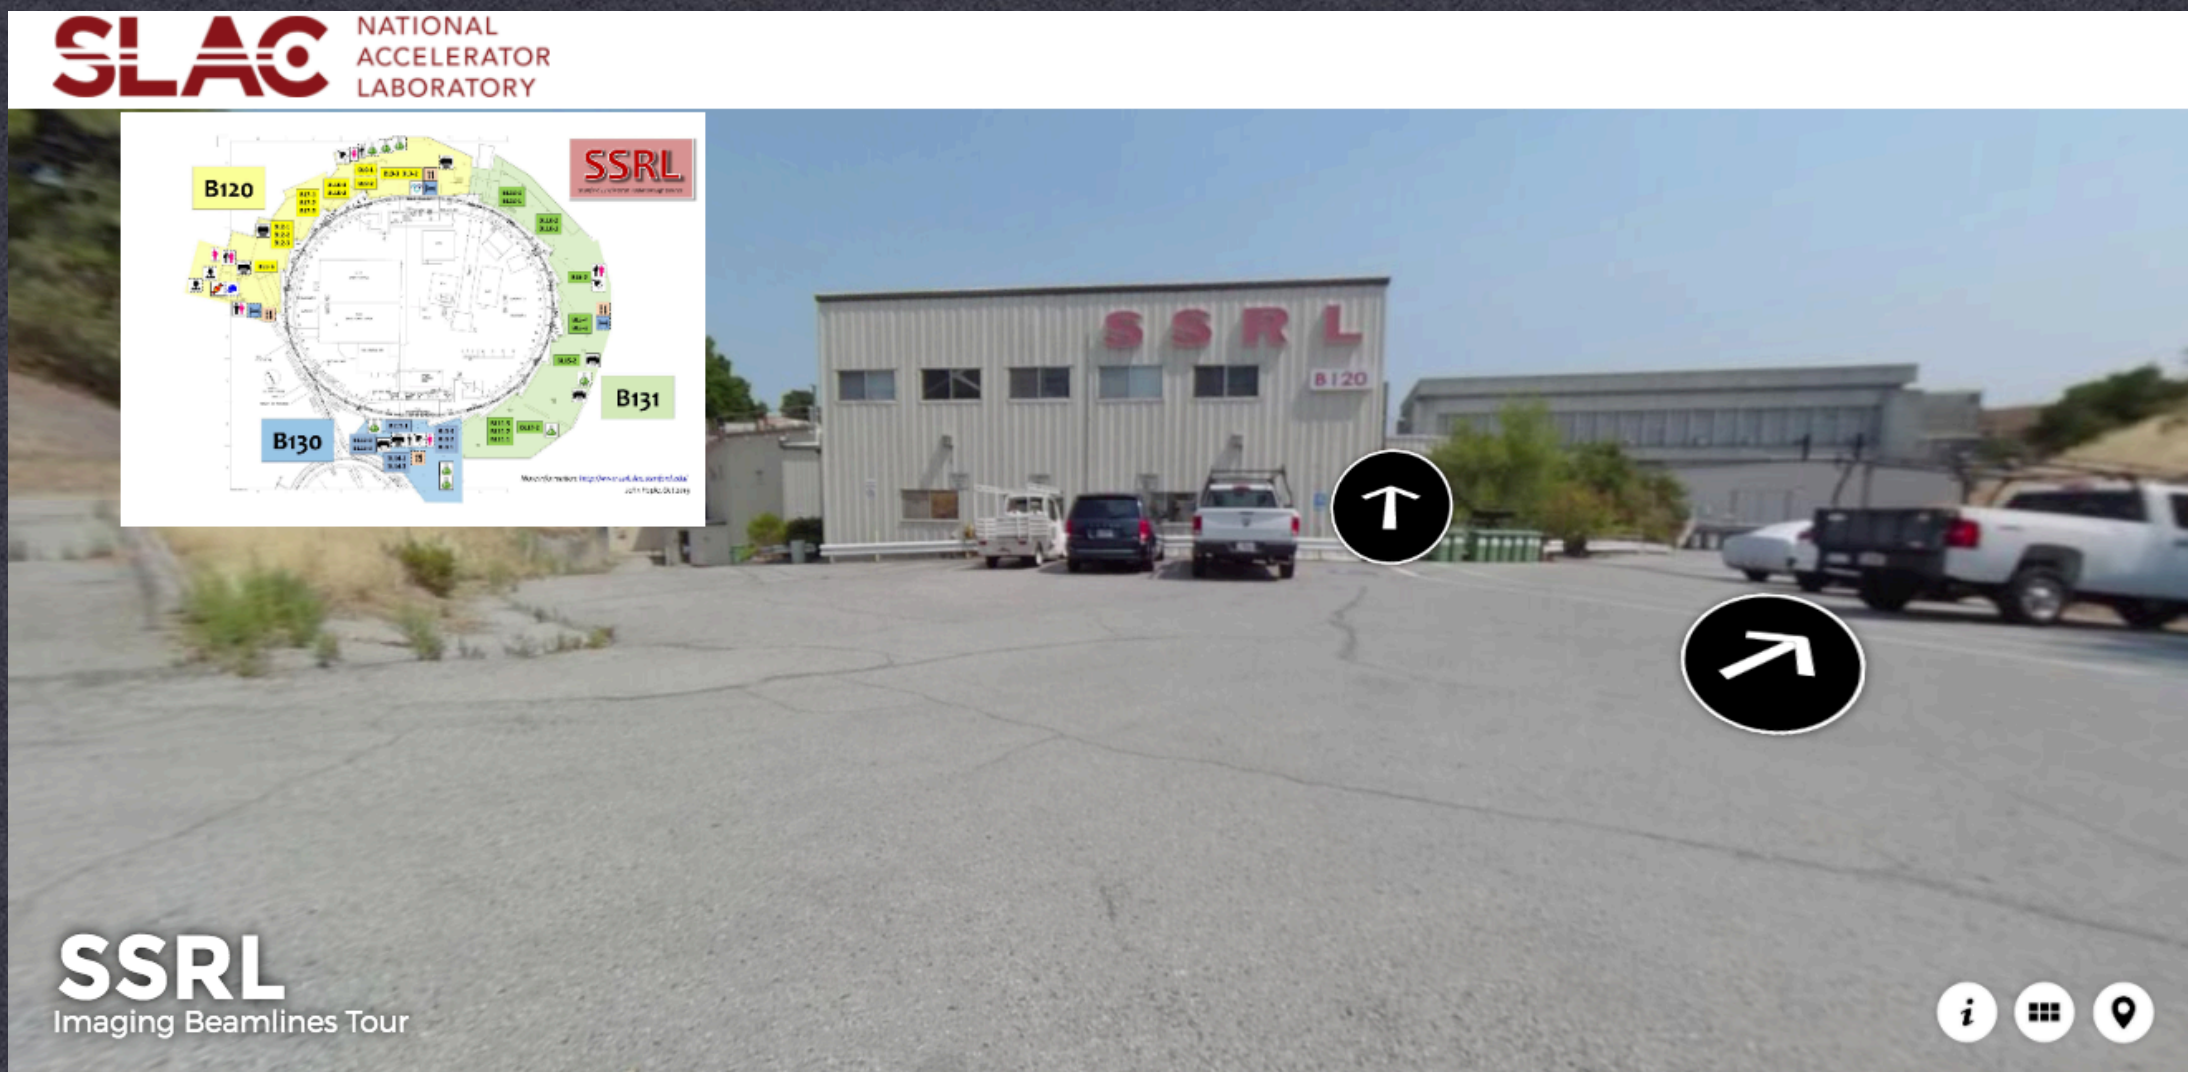

5 hours of lecture materials, ~8 hours  
of video content on data analysis  
covering both XAS and XRF Imaging,  
including sample preparation.

Content from 6 lecturers, 7 data  
analysis experts

Open zoom meetings for hands-on  
discussion of user's data in 4 parallel  
topical sessions

## “Summer Schools”

Shift to a virtual lecture series and hands-on sessions

# “Virtual Hands On”

Give participants the feeling of the facility

<https://www-ssrl.slac.stanford.edu/~swebb/tour>

Caltech

**DIMXIMAGE**

Advanced training on the analysis of synchrotron based X-ray images for heritage and ancient materials

October 14-16, 2019

**DXC**

69<sup>th</sup> Annual Denver X-ray Conference  
A Virtual Event • 3 - 7 August 2020

SYNCHROTRON RADIATION AND NEUTRONS  
IN ART AND ARCHAEOLOGY

February 22-24, 2021  
online event

- Tutorial information for users is not just limited to lightsource sponsored classes
- Reach a wide variety of user audiences, and target experimental and data analysis needs to a group - from highly specific to very general, or beginner to advanced
- Can include short courses, workshops, tutorials, seminars, group meetings...
- “No longer” limited by the need to travel - shift to remote media can enable a wider reach

## “Other Venues”

Tailor-made presentations/content for targeted audiences

## Useful Links

- Experiment Support
- Group SLACSpace Site
- SPEAR Status
- X-Ray Trouble Shooting
- VUV Beam Lines
- Online Equipment
- Manuals

X-ray Data Booklet Online  
Center for X-Ray Optics  
Super Manual

## Beam Lines

2-1	2-2	2-3
5-4	6-2	8-1
8-2	10-1	10-2
13-1	13-2	13-3
14-3	SLM	

## Beam Line Documentation

The microbeam setup at BL 2-3 has a unique set of software interfaces for the user to collect and process data. The following guides will help first time users get started with many of the most common tasks.

### Beam Line 2-3 Guide

A beam line specific quick start reference for setting things up, taking data, frequent questions, and the old troubleshooting page

### BL2-3 Troubleshooting

Fixes (hopefully) to common problems

### Microprobe Analysis Toolkit (SMAK)

Software to visualize your XRF imaging data and XAS queue builder.

### XAS Data Collection

X-ray absorption data collection is performed by uXAS.

### XRD Data Collection

Data collection for XRD on the CCD camera is done with a combination of PI-XRD and WinView/32

### XmapGUI - XRF Collection

XMAPGUI is used for fluorescence spectrum acquisition and is used to set up the SCA windows (regions of interest) for XRF mapping or collection

### Getting your data from the T: Drive

This is directions on how to download your data from the T: drive on any computer

Follow the links below for useful information on how to use SMAK and SIXPACK

### SMAK

Contains sections on:  
SMAK Basics (at the beam line)  
MCA data (import & fitting)  
Quantitative Analysis  
Principle Component Analysis  
Particle Statistics  
XANES Fitting

Get help >

### SIXPACK

Contains sections on:  
SIXPACK Basics  
Normalization  
Aligning  
Principle Component Analysis

Get help >

### 2-3

Hard x-ray microfocus imaging and XAS  
4.9 - 23 keV  
3 micron  $\phi$  focused beam  
25 x 25mm scan range

### 6-2

Tender/hard x-ray macro-imaging and XAS  
2.2 - 15 keV  
25, 35, 50 & 100 micron  $\phi$  pinhole beam  
1m x 30cm scan range

### 10-2

Hard x-ray macro-imaging, XAS and HERFD  
5 - 22 keV  
25, 50, 100 & 150 micron  $\phi$  pinhole beam  
60 x 30cm scan range

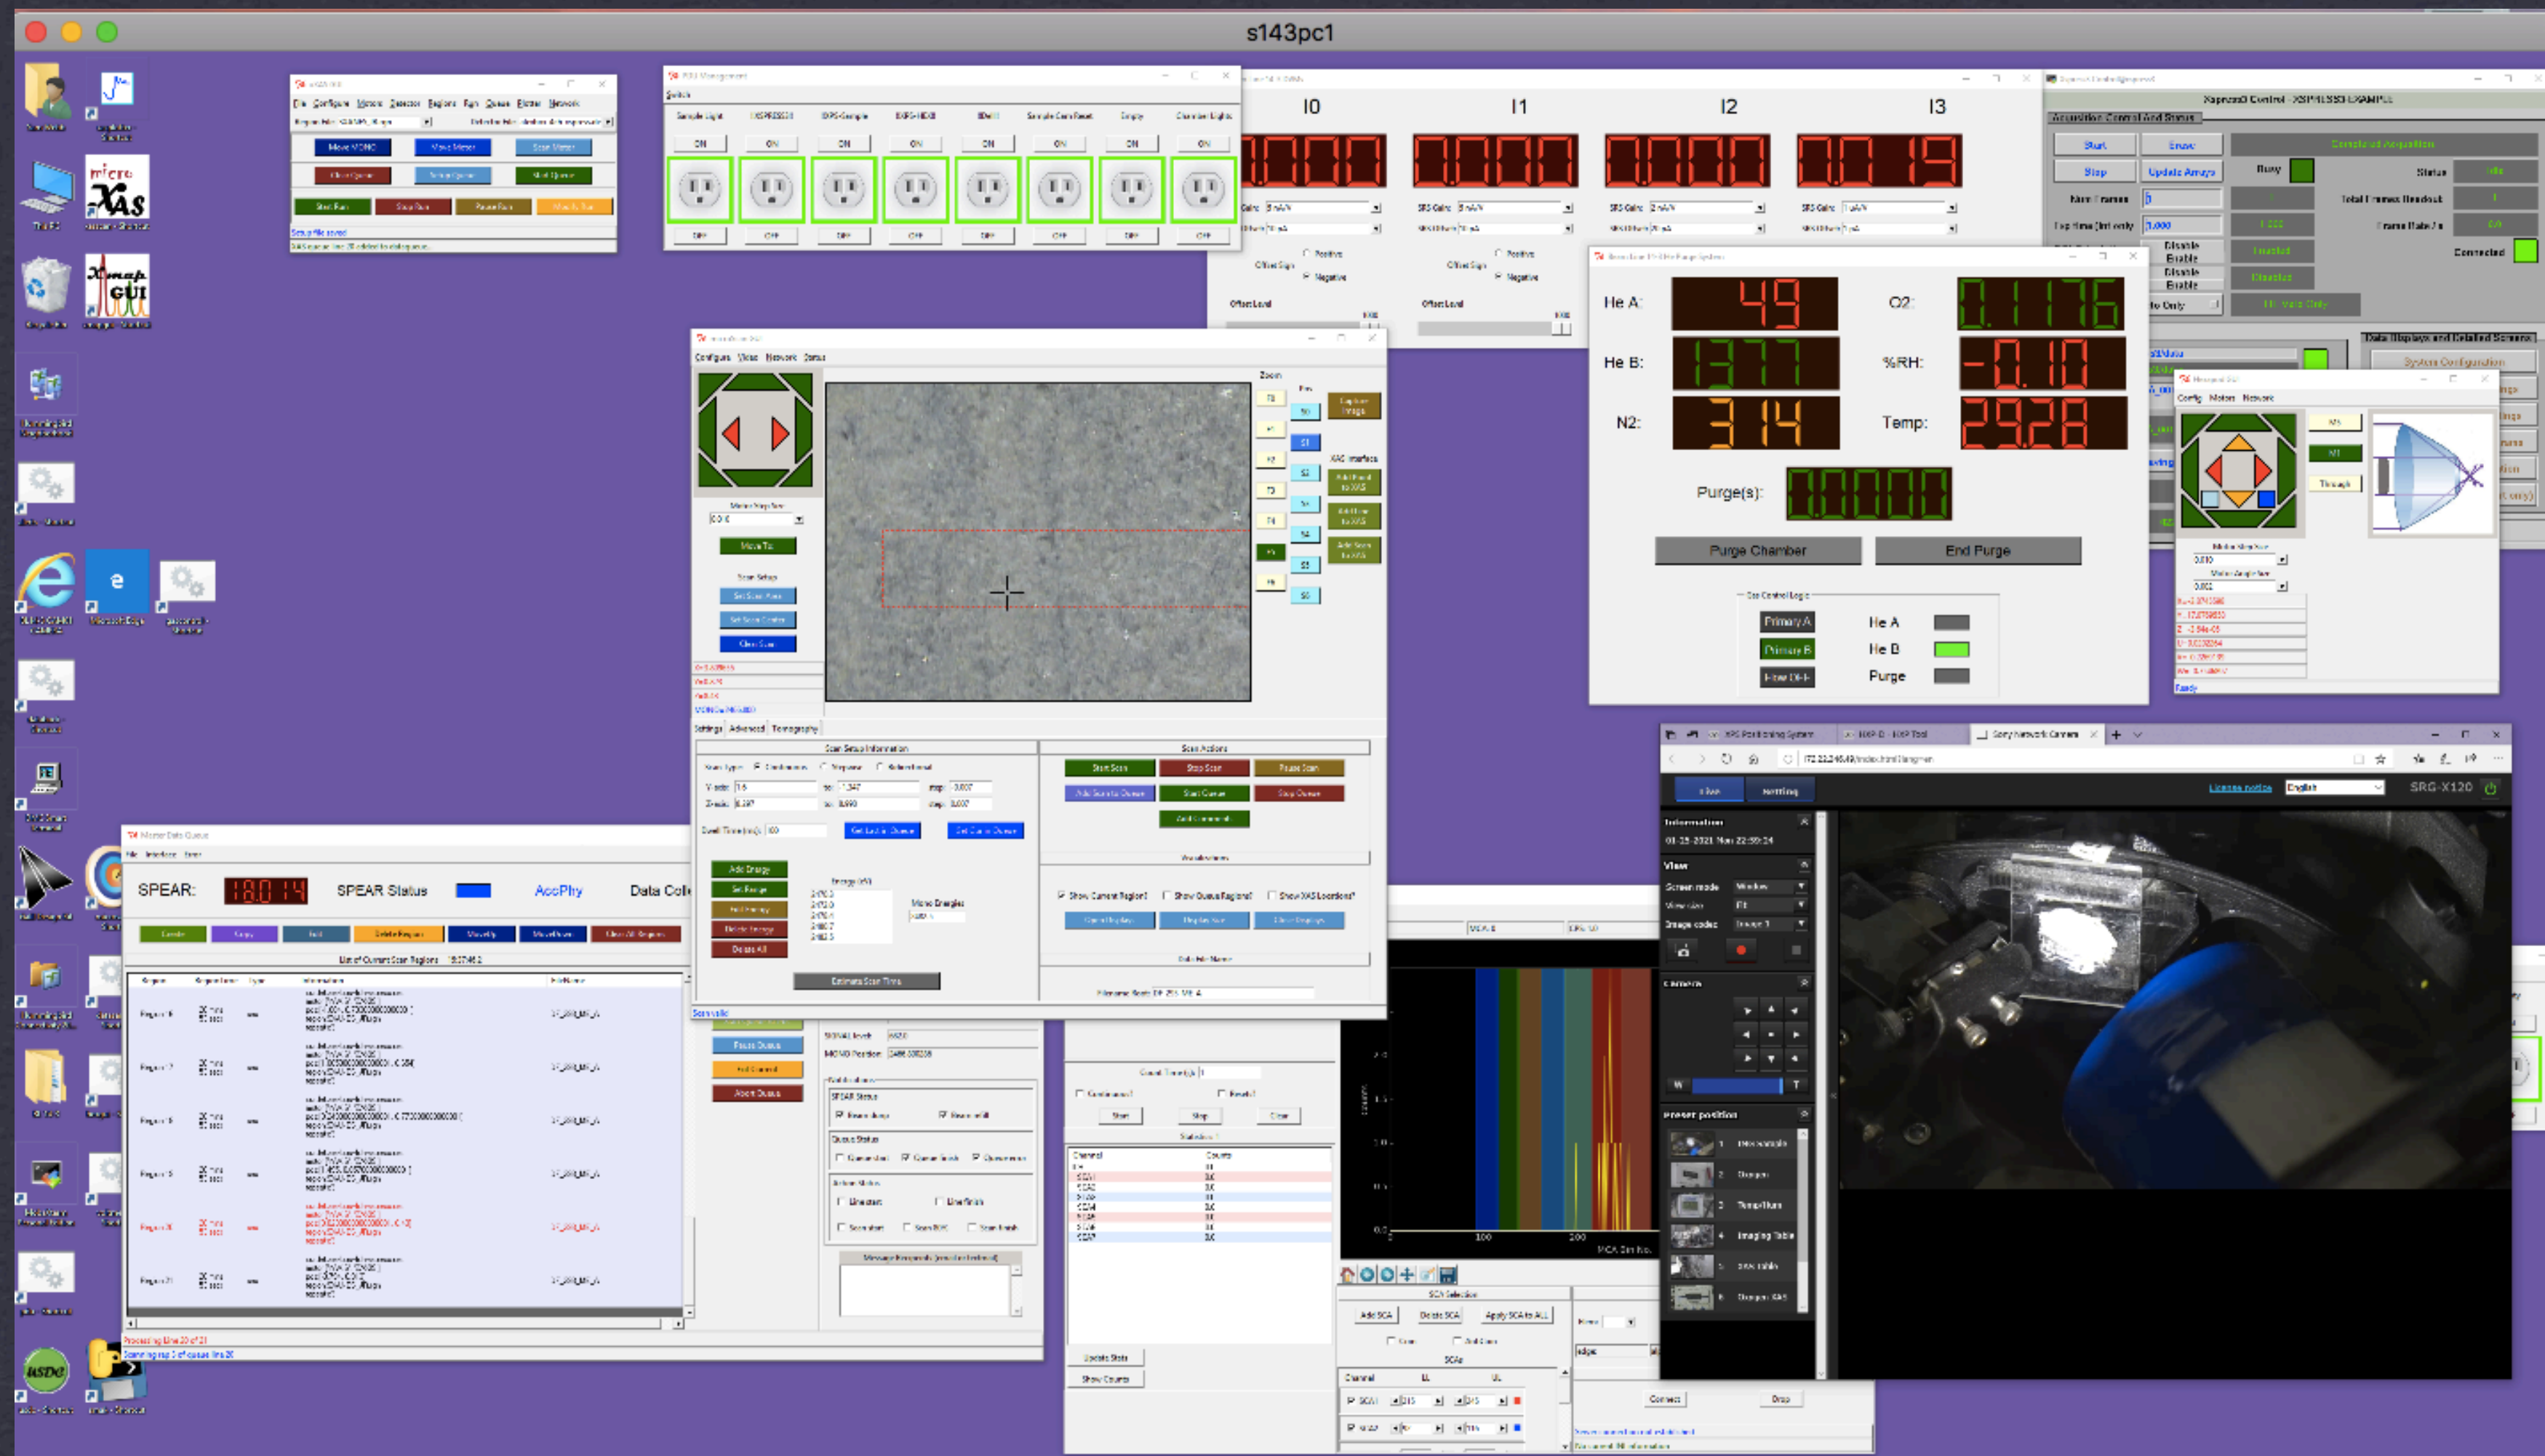

### 14-3

Tender x-ray microfocus imaging and XAS  
2.1 - 5 keV  
3 micron  $\phi$  focused beam  
25 x 25mm scan range

- Wiki's were a great idea — but not many users added content...
- Use webpages accessible by the community, and include a variety of content (text, pictures, videos...)

# Online Documentation

It is amazing how useful a manual can be...

- Tools for dual conferencing-BL activity
- Tools for visualization and control of the entire BL

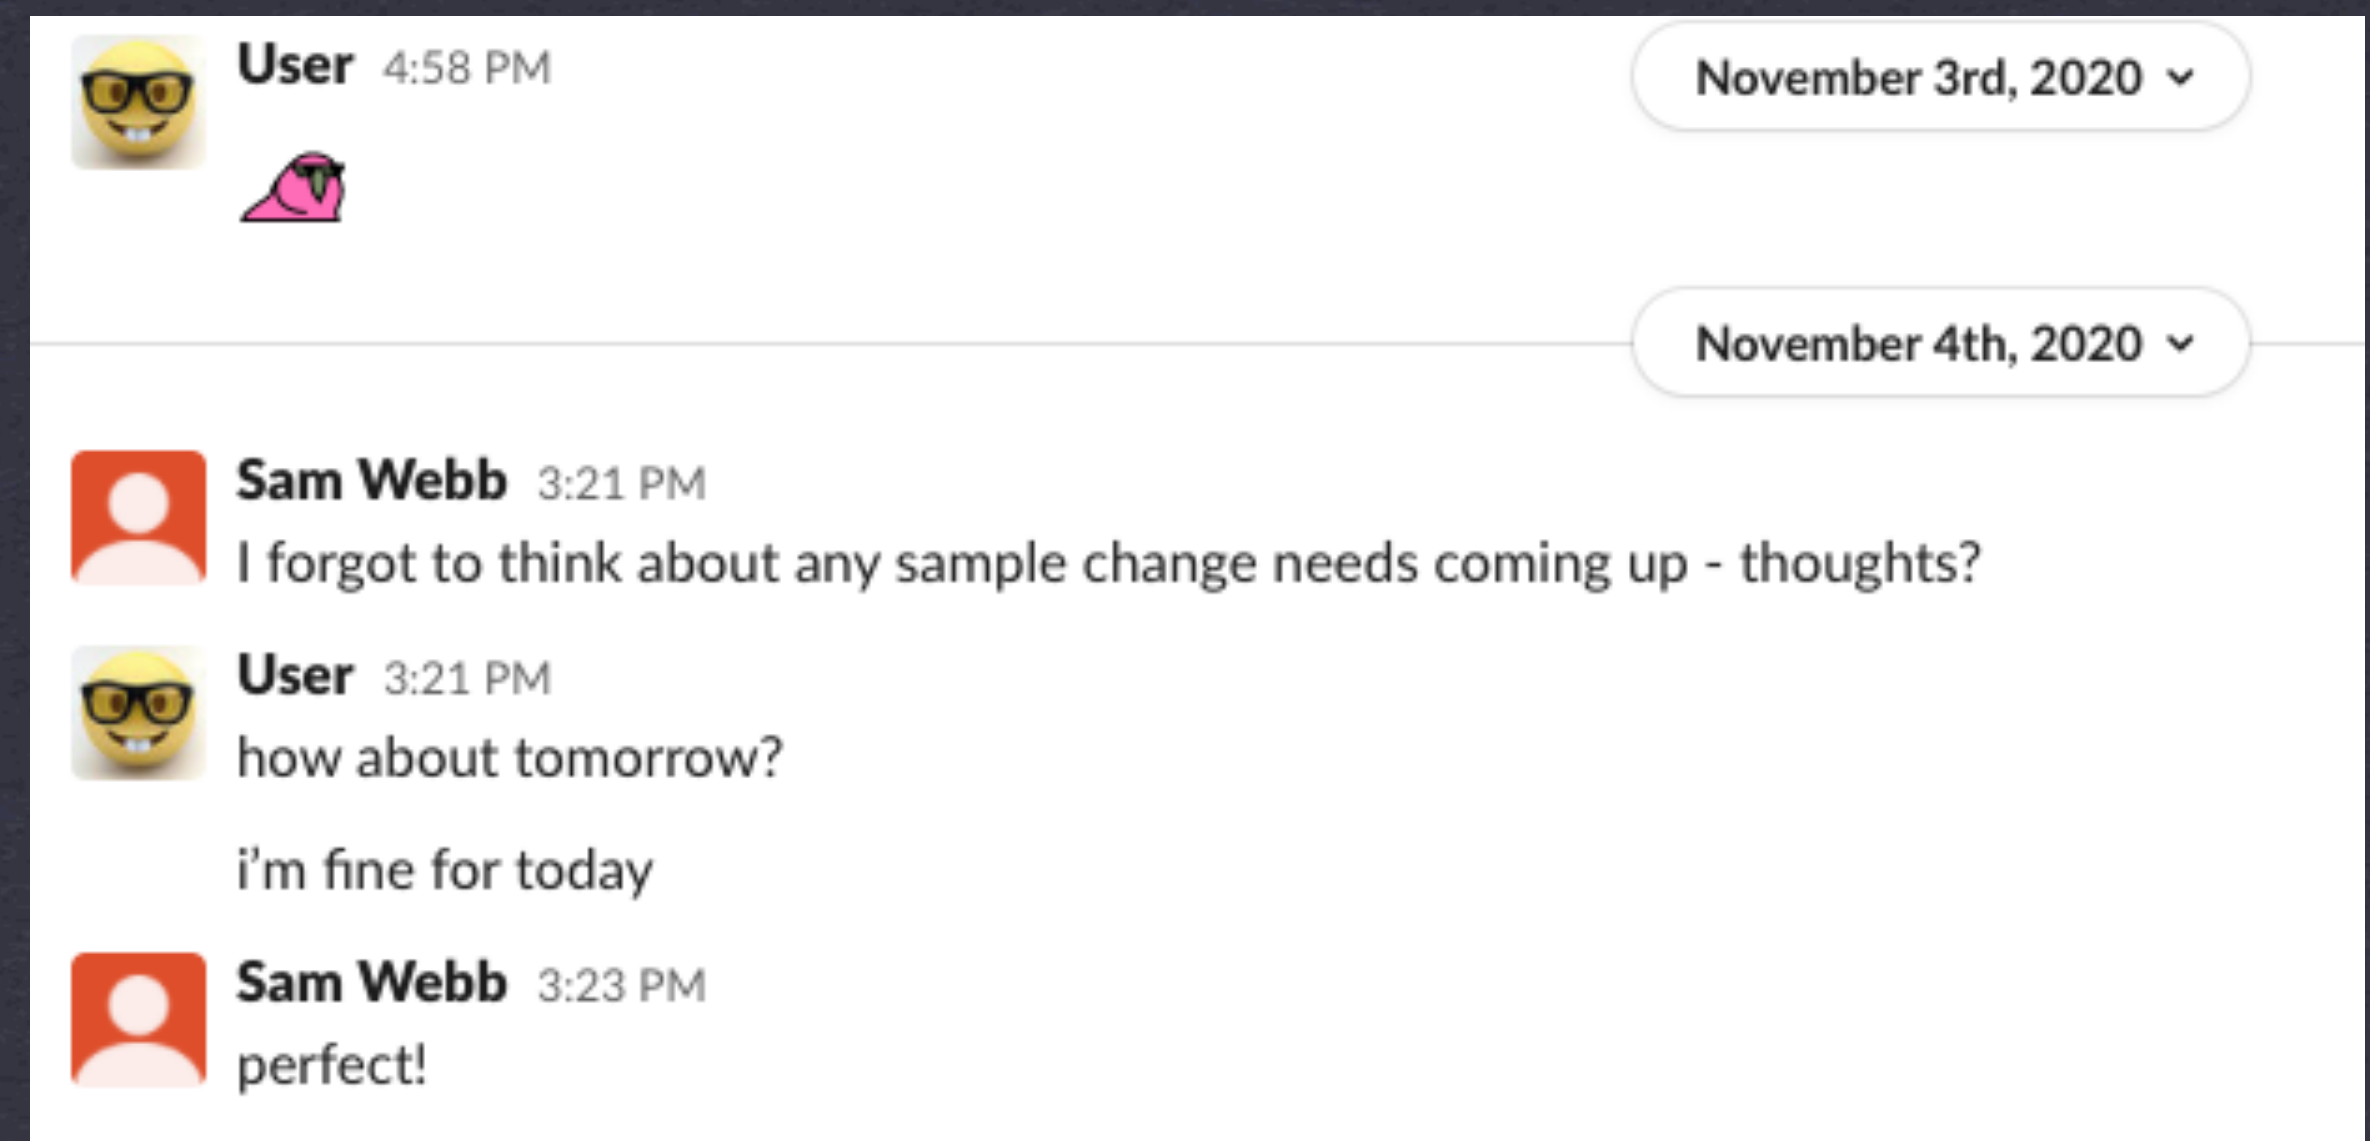

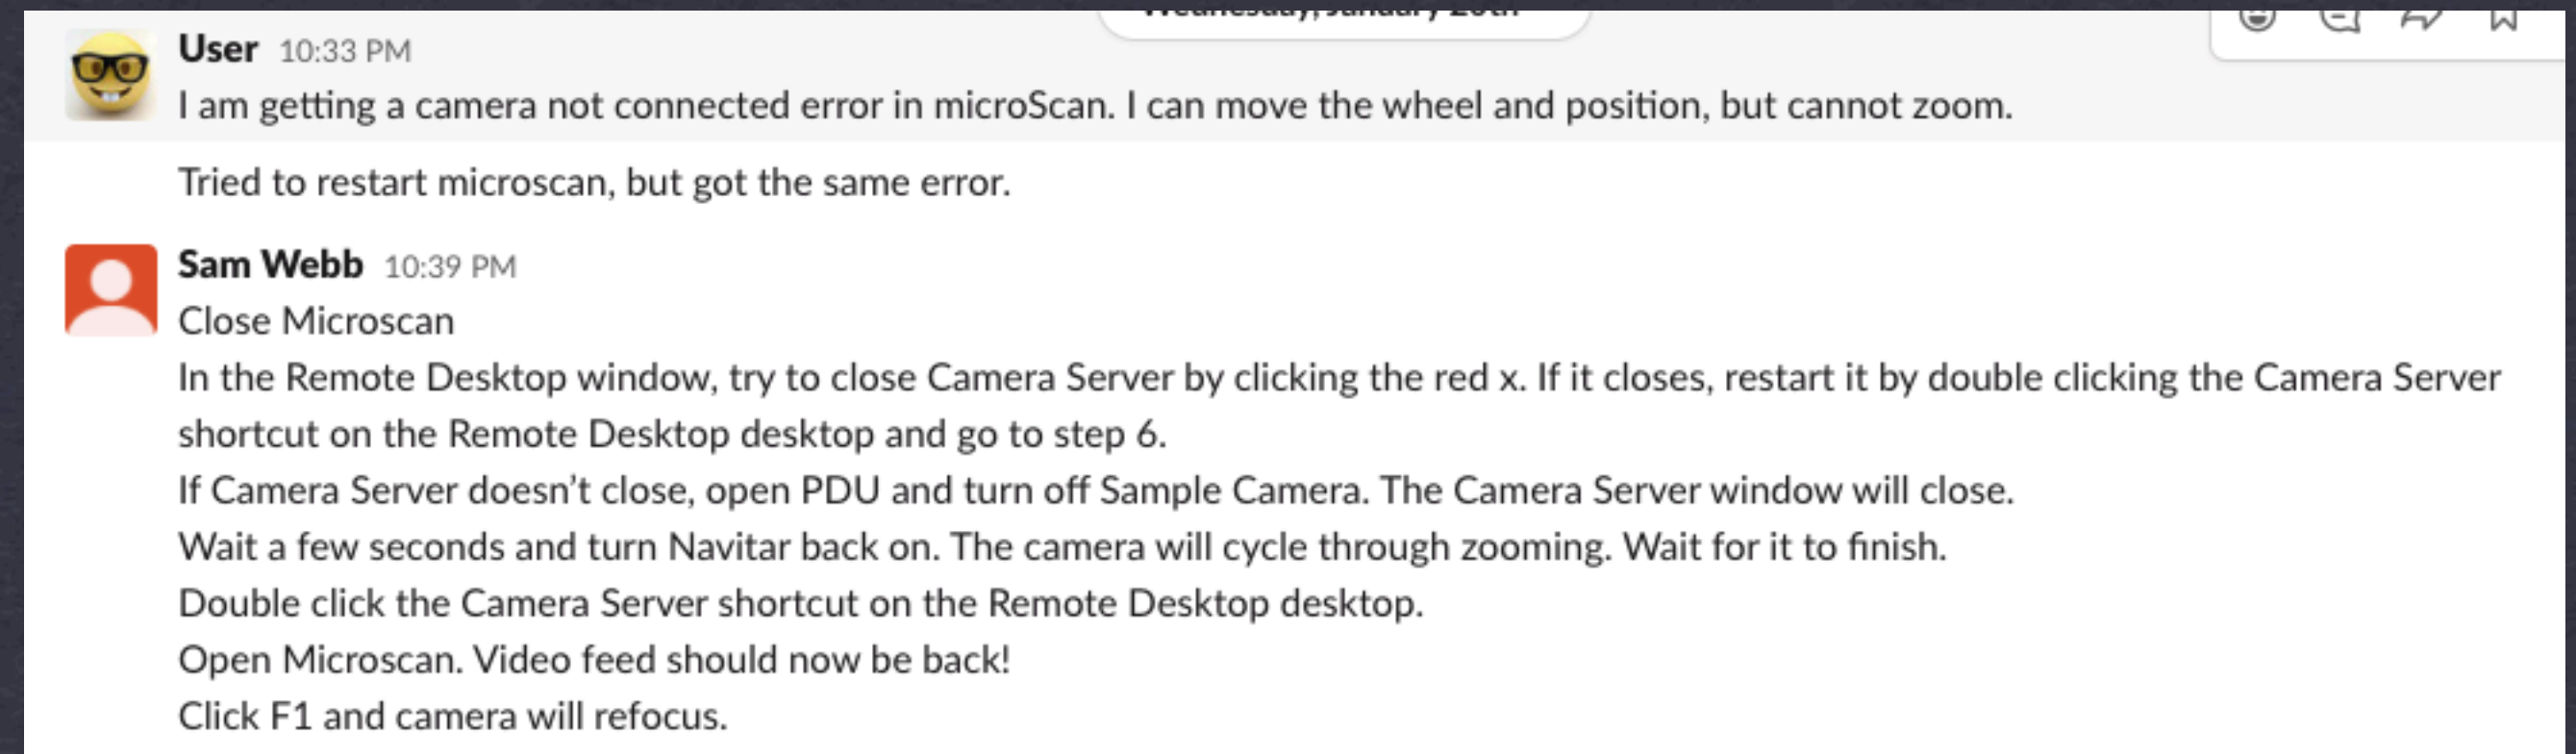

**Virtual on-line training sessions**  
 Simulate the "at the facility" side-by-side learning

**SSRL Imaging Support**  
ssrlimagingsupport.slack.com

- Initially implemented for on-site users who had limited access to phone/text communication — rapidly transitioned to use for remote access
- Handle training issues
- Handle user communication for remote access issues
- Centralize responses to users from experimental support teams, rather than phone calls/texts/emails

## Online assistance

Handle situations that training missed (or users have forgotten)
