

Field work WPC (hardware)

Requestor

Generate work request (email, CATER, schedule etc).

Christine Clarke 1/13/2023

This sheet was produced based on AD ALD All – hands 1/9/2023 presentation

This shows ALD AD desired work flow as I understood it.

FACET User Area is unique in that we have a lot of user work during PAMMs in very tight space, usually driven by our scientific users. Though all users are trained in WPC (course 120 and AD103), WPC management is done through a coordinator to ensure it is consistently and reliably applied and to develop an integrated schedule and hazard analysis that catches and mitigates for hazards that arise due to jobs being done in parallel. Additionally this results in a single point of contact that can address questions and issues as they arise.

Subsequent slides document our existing user work process and how we will incorporate the new steps in this process.

Work that involves shops is often (but not always) done with us in the role of “requester” whereby we provide technical information and a schedule.

Worker(s)

Analyse work, write/ find procedures, participate in planning meetings

Attend pre-job meeting, discuss work, voice concerns

Perform work, be aware of changing circumstances and be prepared to stop

Person In Charge

Analyse work, write/ find procedures, hold planning meetings

Request permits and config control forms

Complete Smartsheet with analyses, check checkbox that prejob briefing has not been held and input email address. Submit.

Forward approval to workers, supervisors and Area Manager

Ensure all permits approved, config forms approved, Request release

Lead Pre-job briefing, discuss, update smartsheet form and finalise with date of meeting (finally submit)

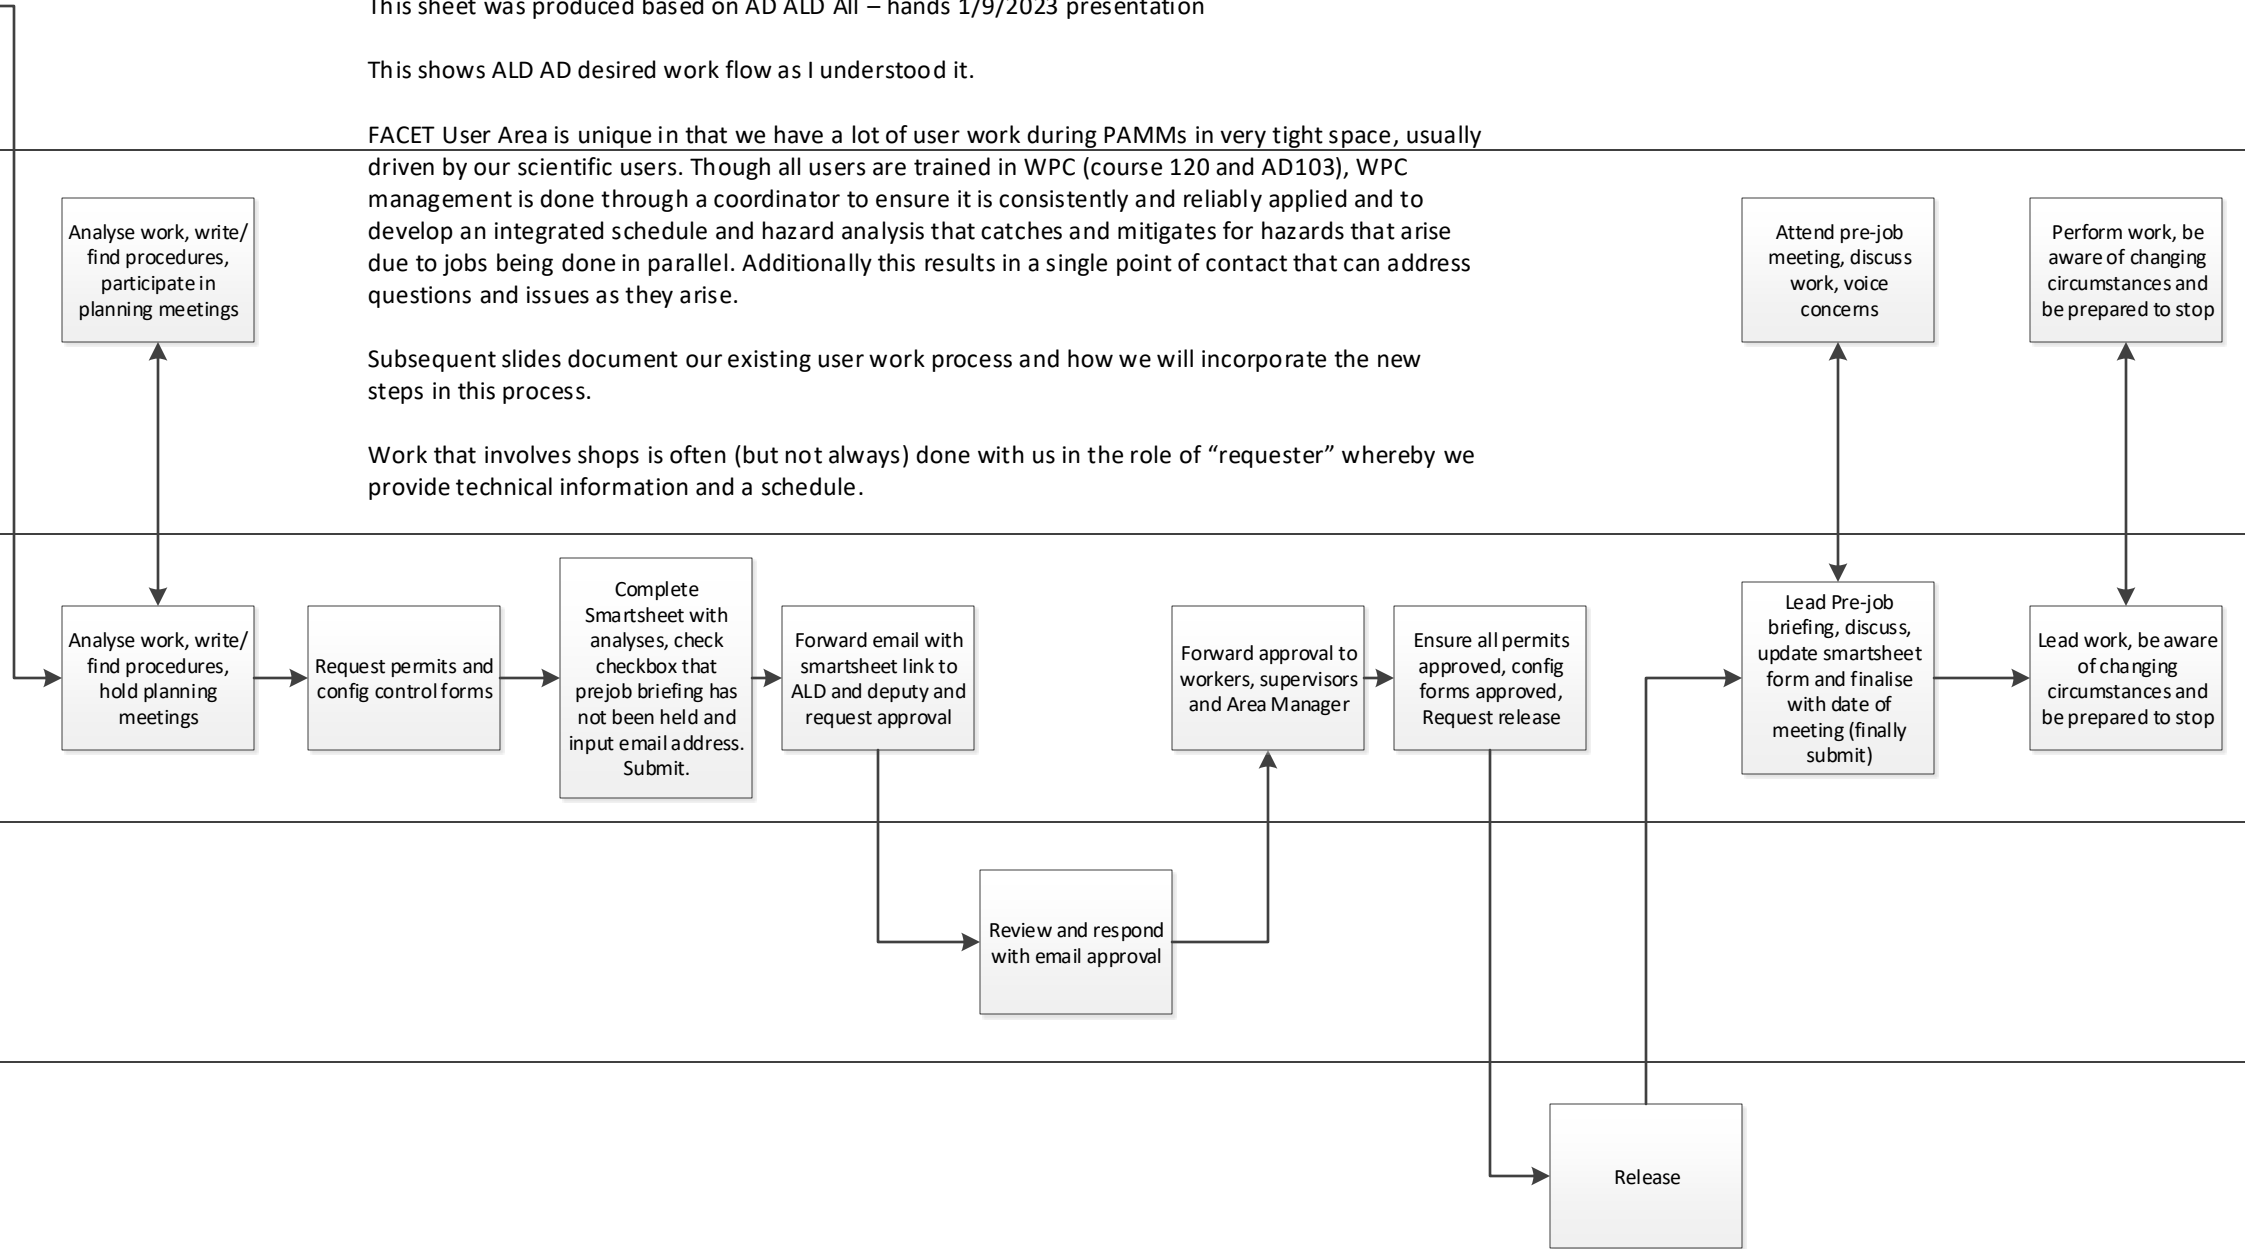

Lead work, be aware of changing circumstances and be prepared to stop

ALD

Review and respond with email approval

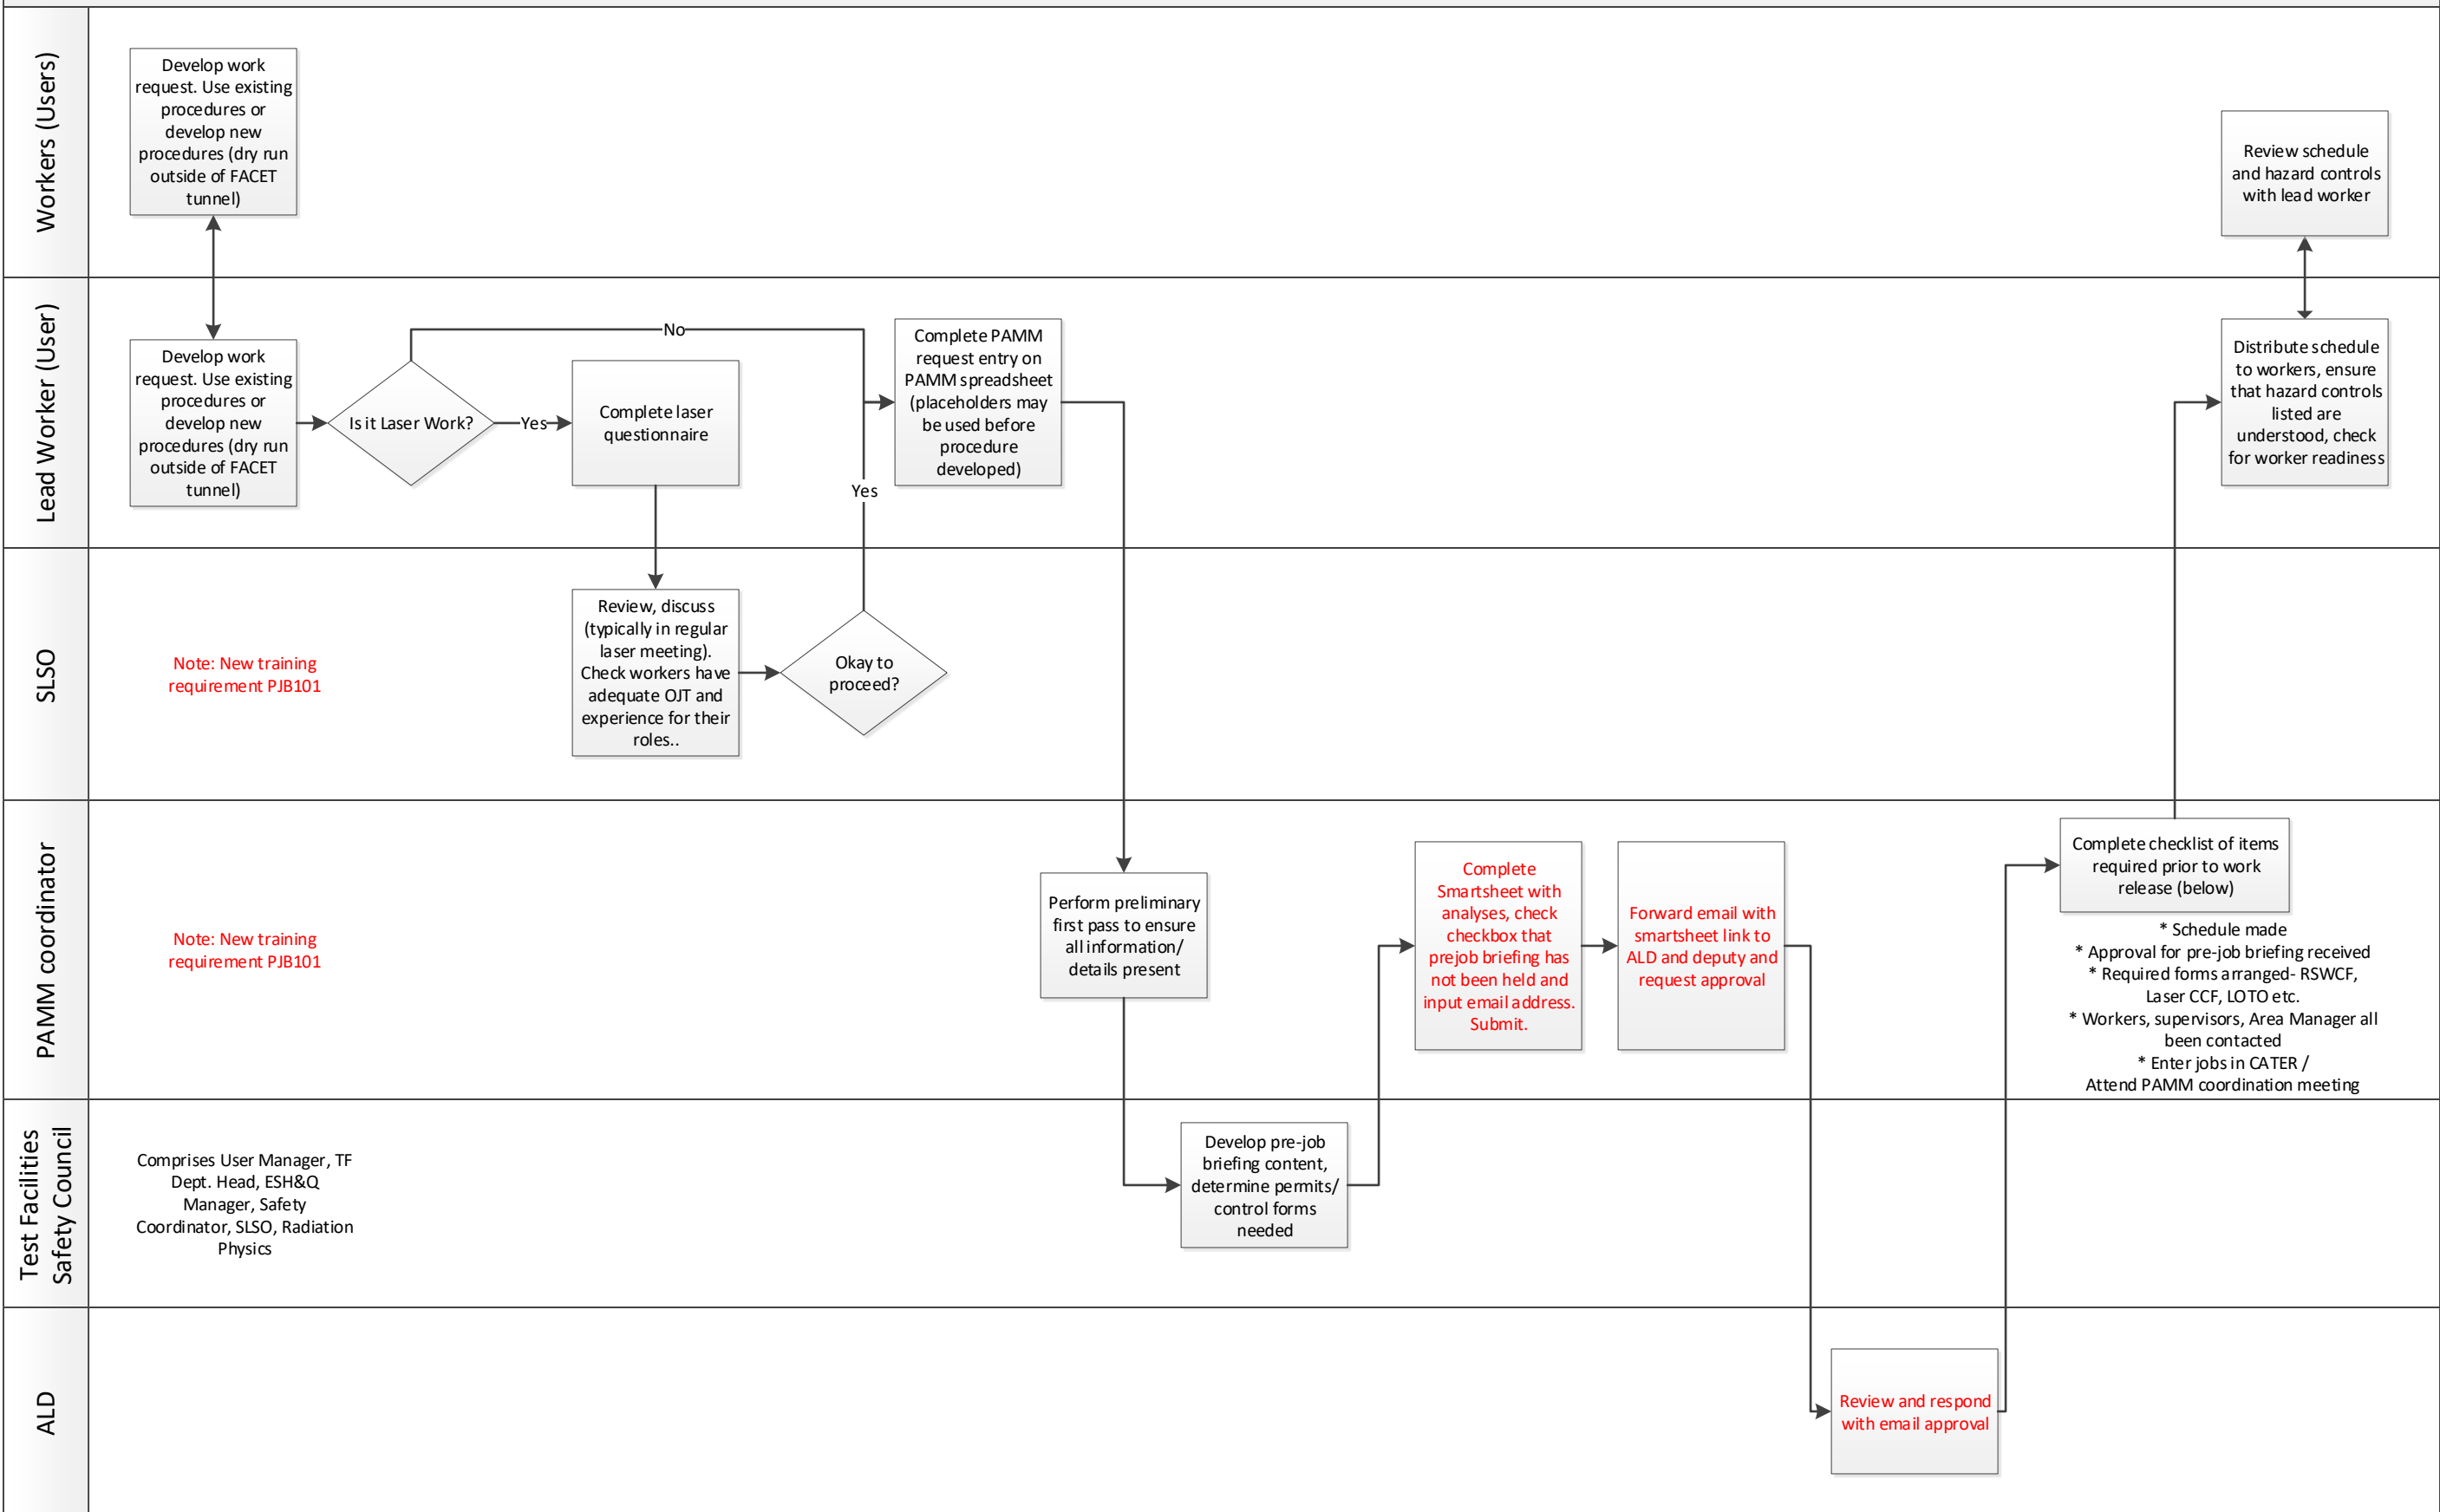

Area Manager

Release

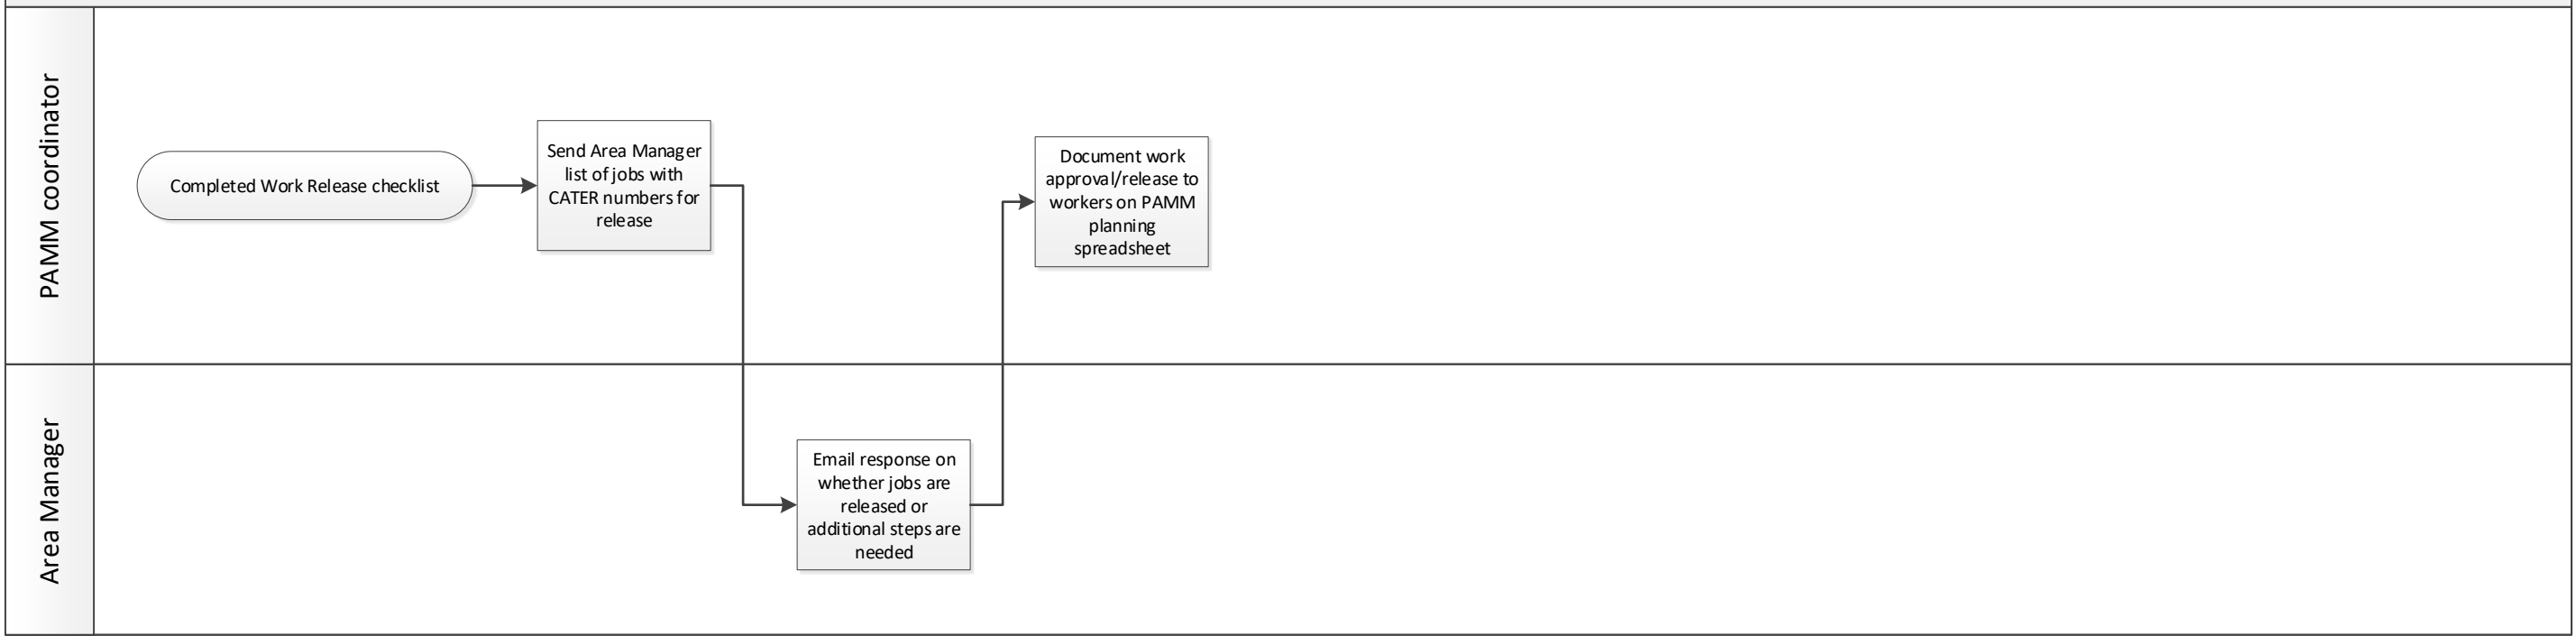

FACET User Area jobs – planning process from request to approval

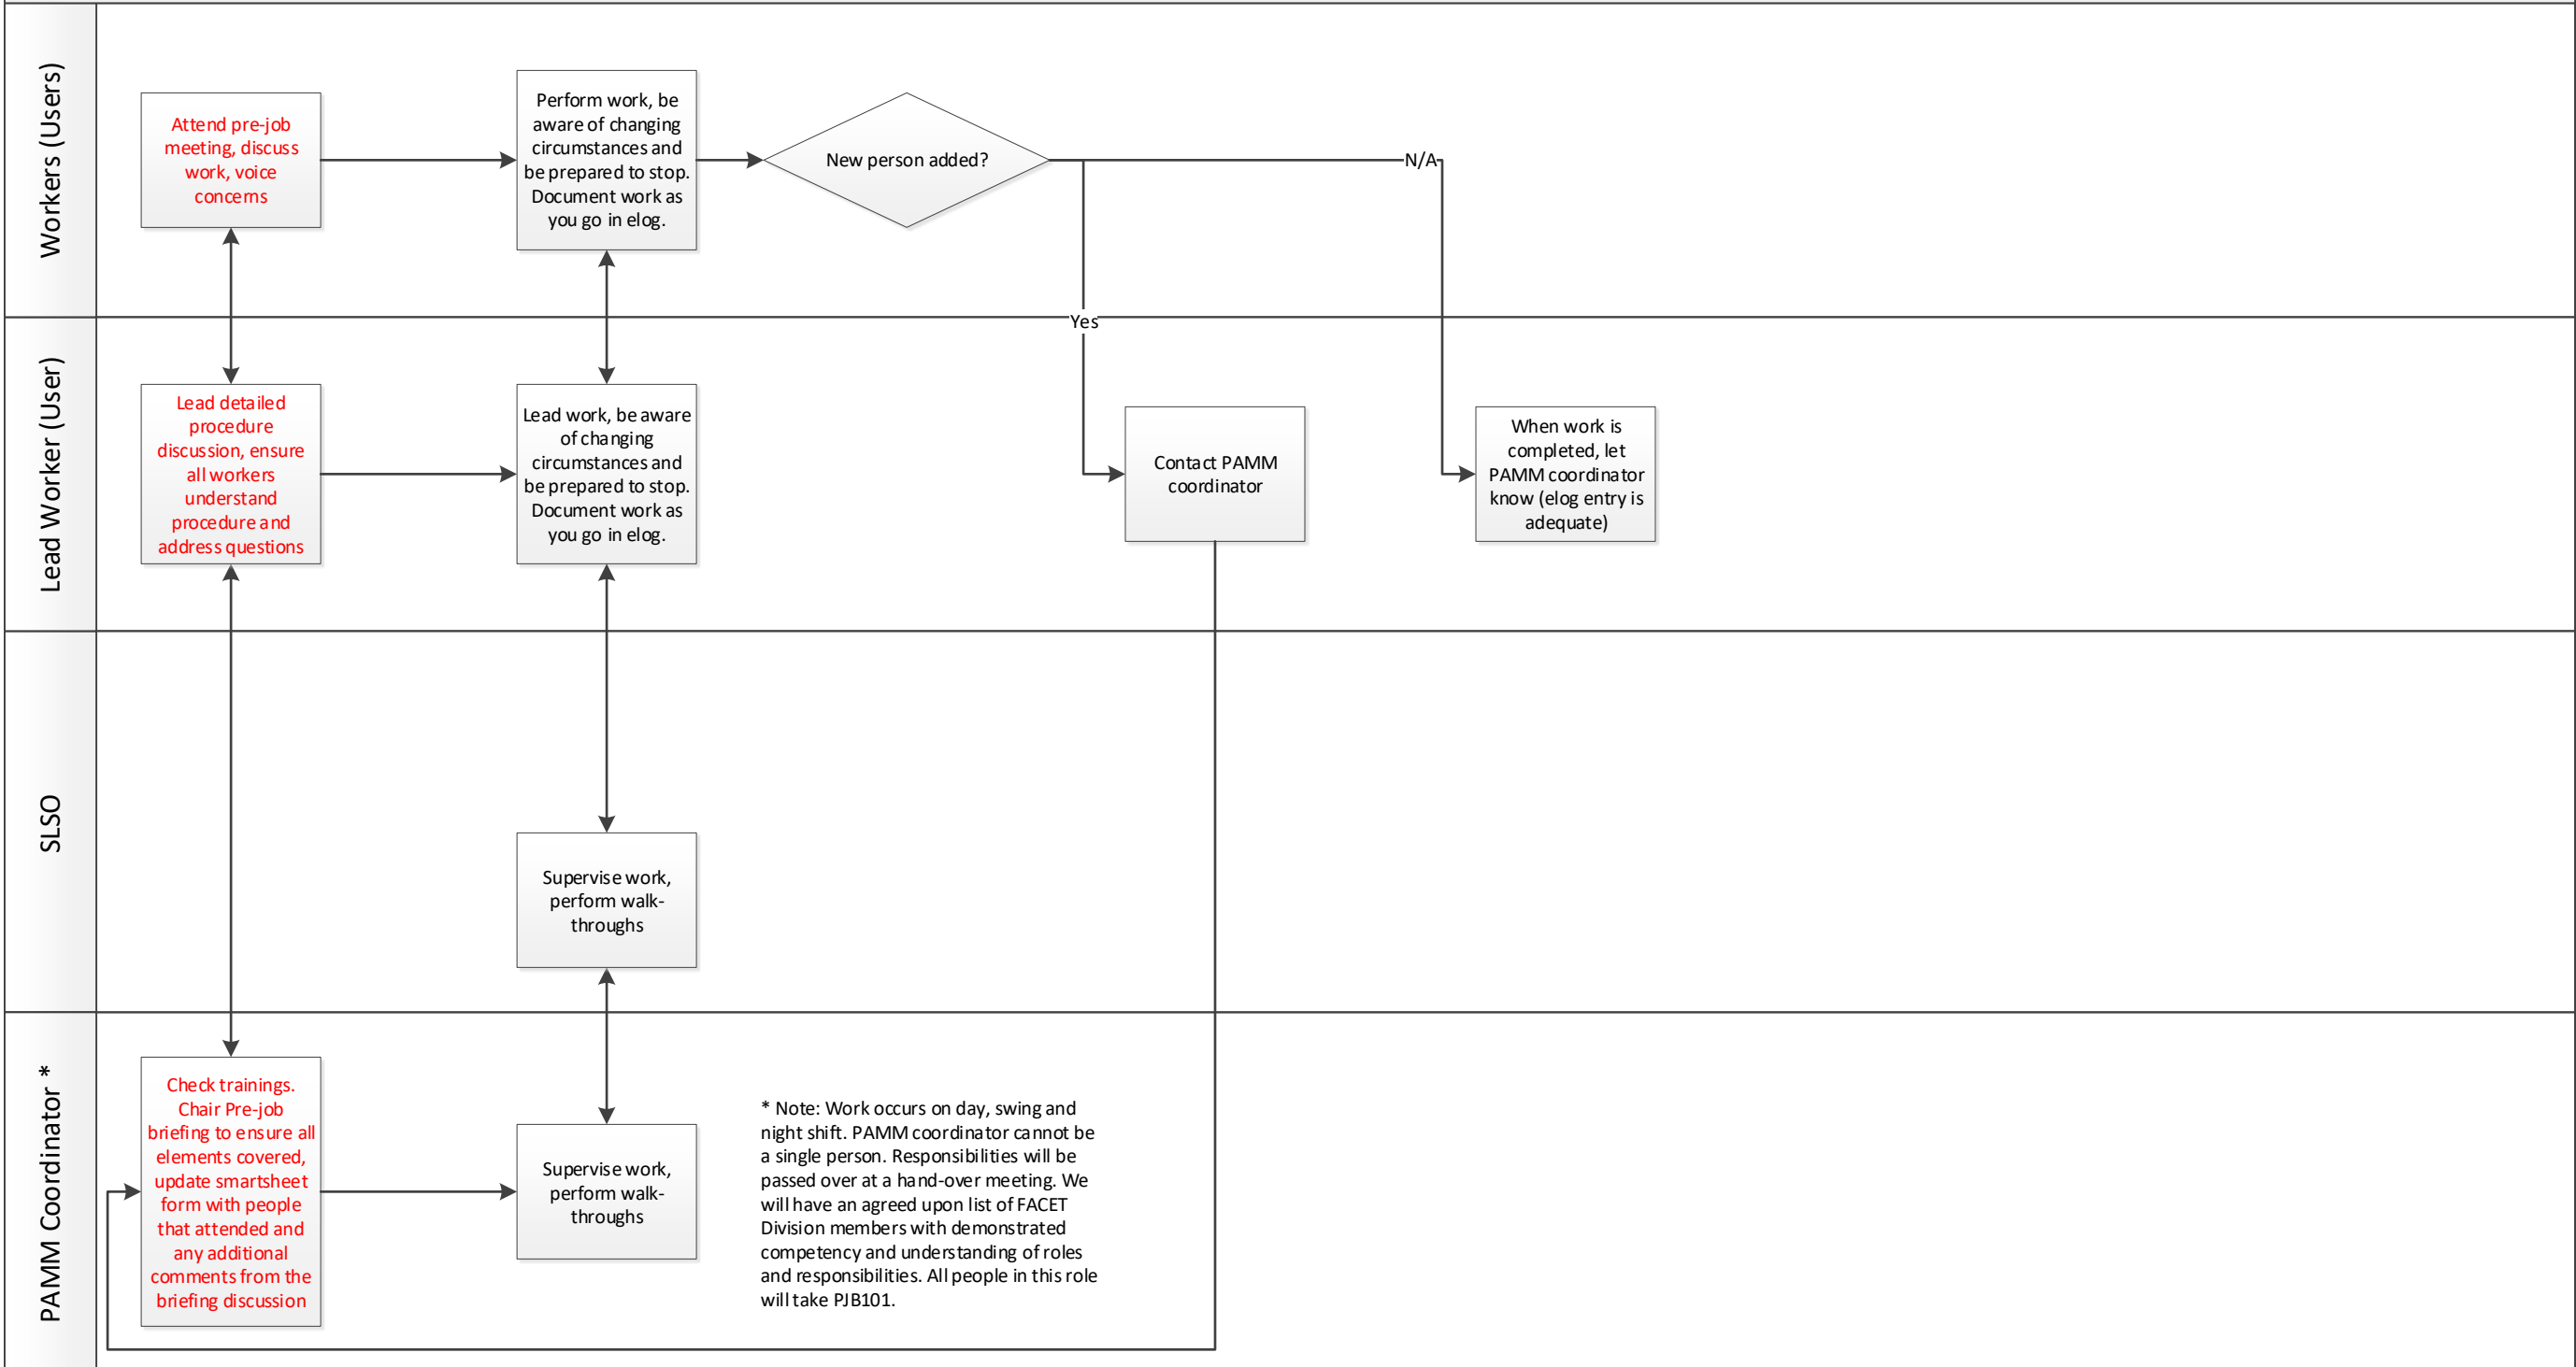

Red text denotes new elements 2023

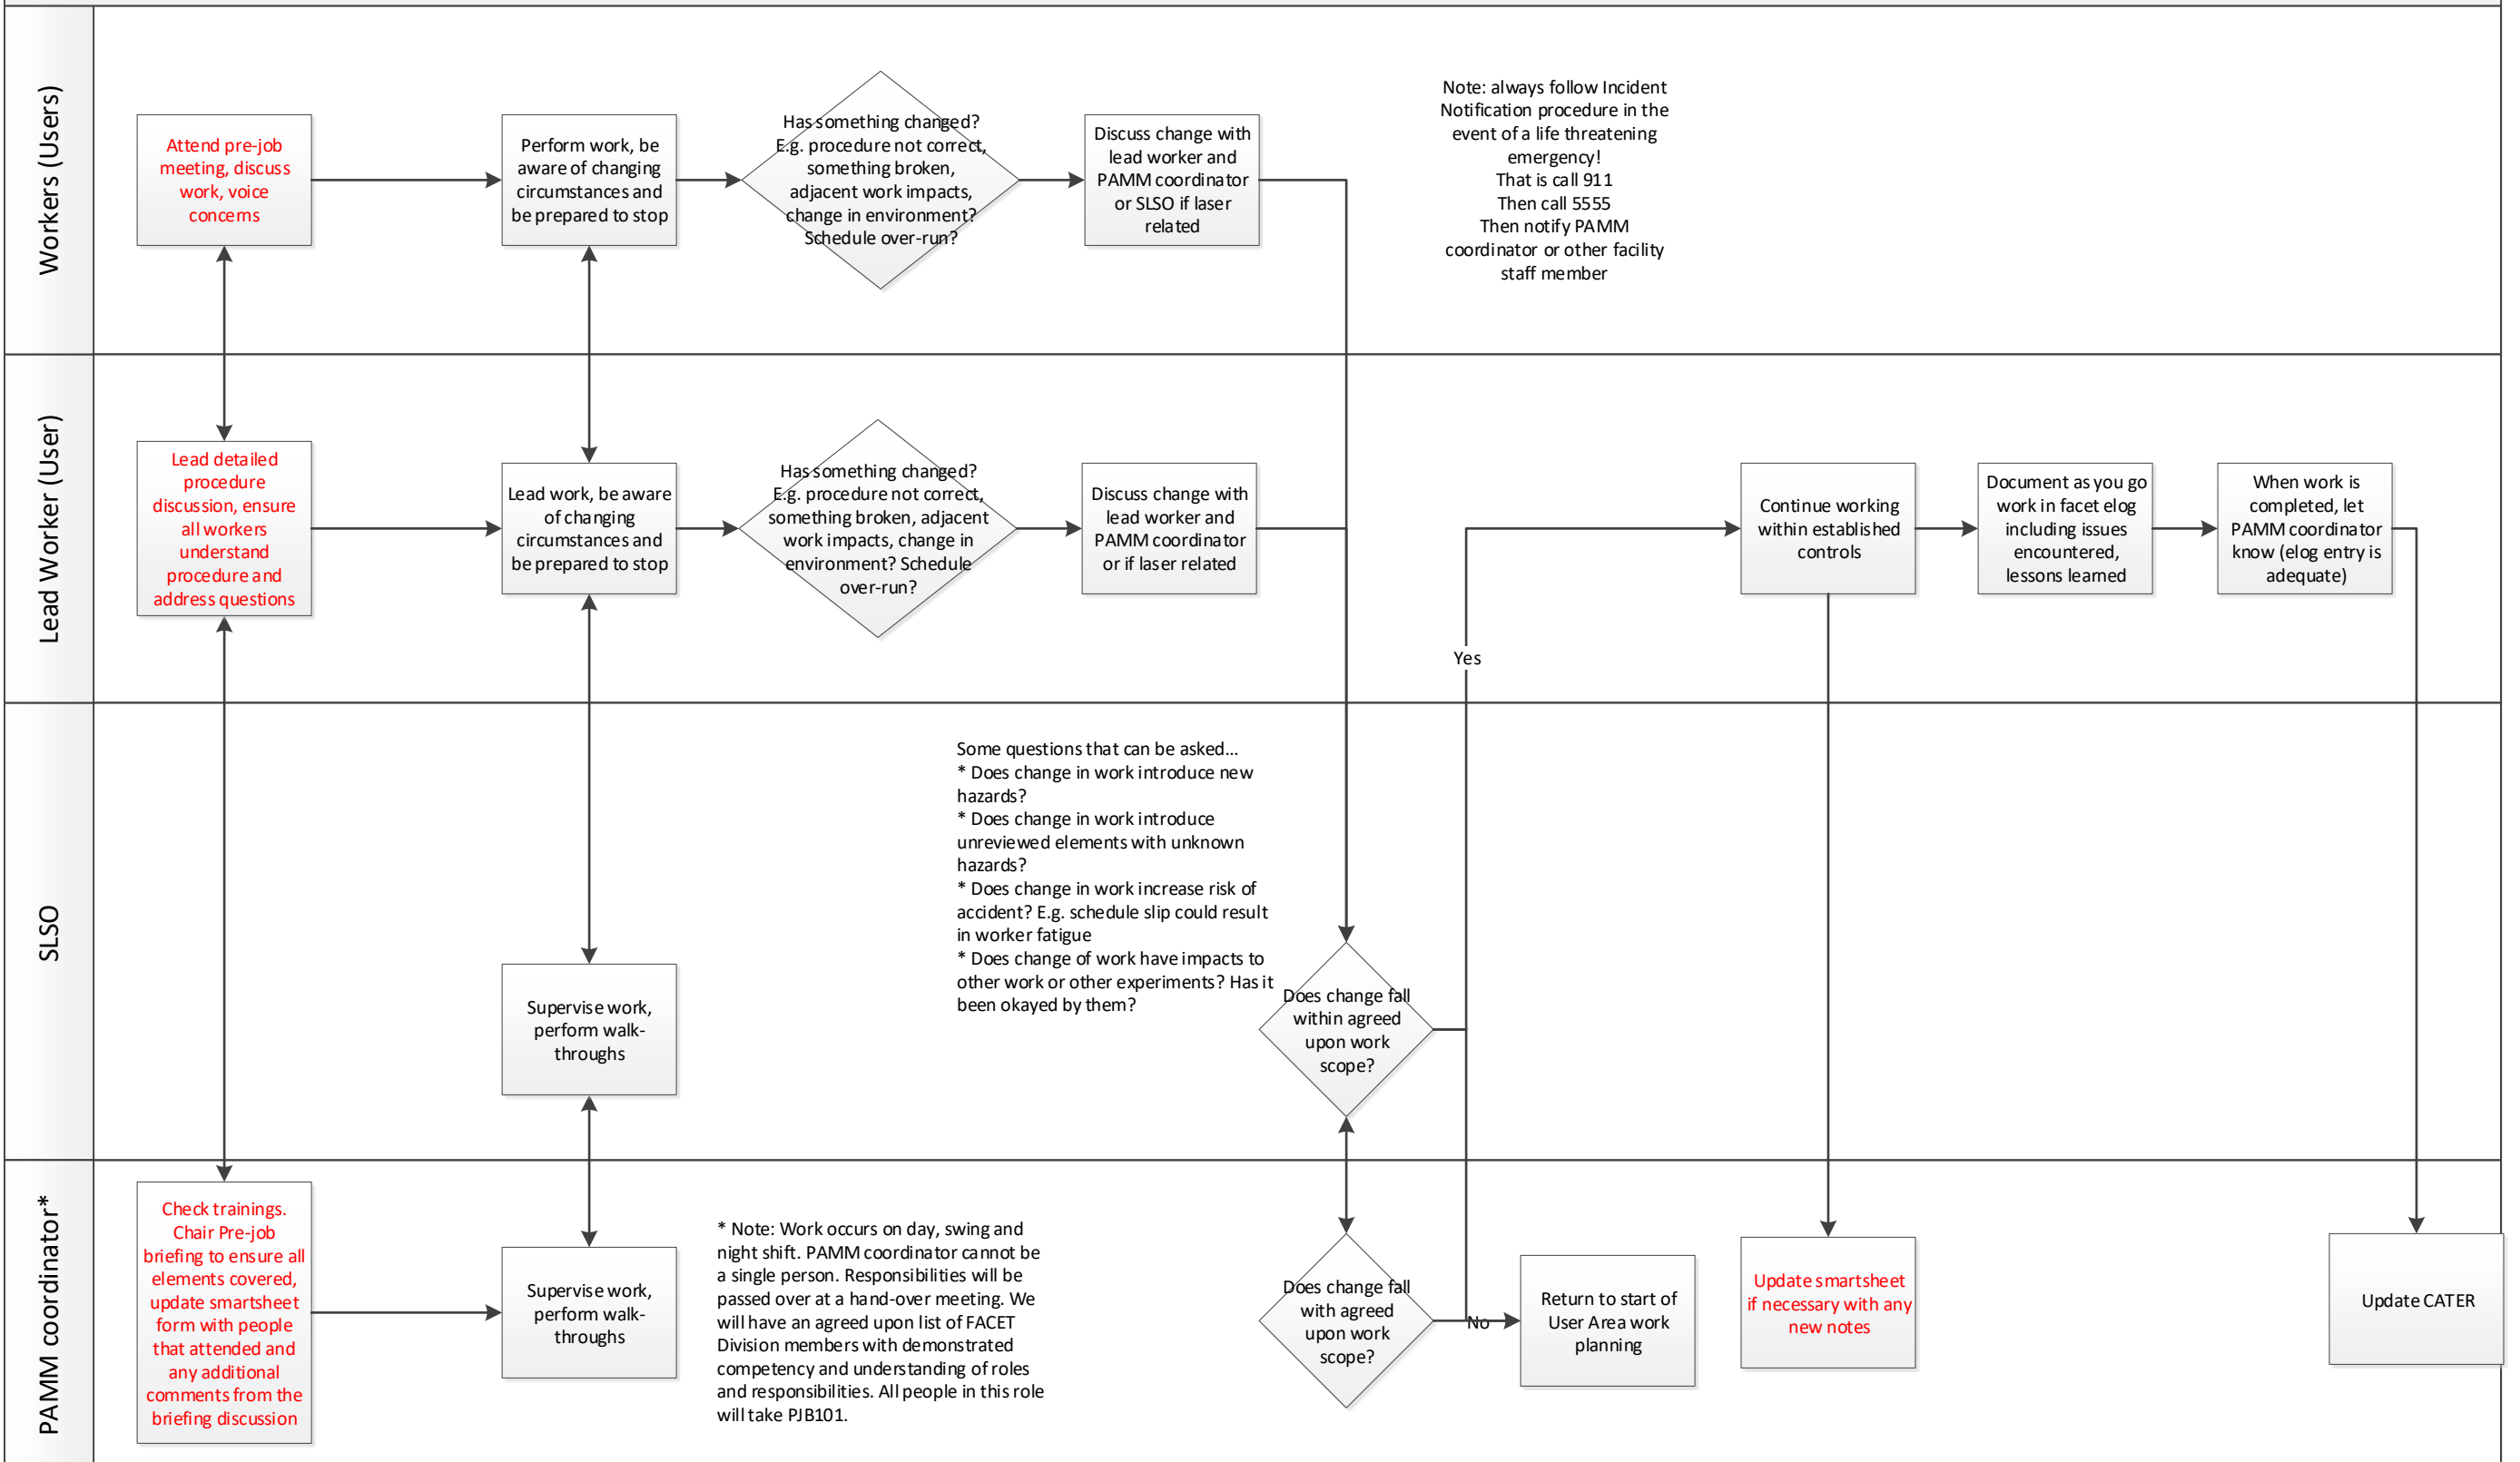

FACET User Area jobs – from completion of work release checklist to release documentation

There are no changes to work release due to these new requirements. Work release is still required and comes from the Area Manager.

FACET User Area jobs – performed at the end of the access

Red text denotes new elements 2023
