

MW Observations of AO 0235+164

Meeting Minutes by Luis R. – December 3rd, 2008

Participants: Joey Richards, Lars Fuhrmann, Vasiliki Pavlidou, Dave Thompson, Eduardo do Couto e Silva, Abe Falcone, Luis Reyes

- Update on MW data: Please see slides attached to the Agenda for specifics (updates on Fermi, GASP, Swift XRT, OVRO and Sub-mm).
- The source flux has decreased in every wavelength. It has been decided to put an end to the MW campaign. Thus, the campaign covers the period between the start of Fermi operations (~Aug 11th) and Dec 1st.
- Luis will set up in the next couple of days a password-protected area for free sharing and discussion of the data. Confidentiality and proprietary rules will apply to these data.
- Analysis tasks and preliminary list of interested people:
 - Cross-correlation: Massimo Villata, Vasiliki Pavlidou and Caltech group, Lars.
 - SED: Greg Madejski, Eduardo do C e S, Lars F., Luis
- Timeline:
 - Data Collection:
 - All reduced data made available in machine-readable format at the password-protected website by Dec 19 2008 (soft deadline, preliminary results OK) and Jan 15th (hard deadline).

Analysis Phase:

- Preliminary results will be posted to the password protected area. Frequent communication by e-mail between people working on specific analyses. Telecons every 2-3 weeks to review results.
- Draft 0 of paper available by the middle of this phase (introduction + outline)
- Parallel work on interpretation and modeling.

Paper Phase:

- First complete paper due at the end of February
- Review by the different teams during March
- Aim for paper submission in April
