

# **Crowd, Confluence & JIRA Outage on March 21, 2011 from 1700-1745 PDT**

Crowd, Confluence and JIRA will all be unavailable on Monday March 21, 2011 from 5 PM PDT to 5:45 PM PDT. During the outage all Linux servers (application and database) hosting these applications will be rebooted to pick up a new Linux kernel which addresses security vulnerabilities. Please send comments or questions to [confluence-admin@slac.stanford.edu](mailto:confluence-admin@slac.stanford.edu).
