

Projects

Projects

This would be a great place to have some introductory documentation on each project. Currently we have

- [org-glast-jobcontrol](#)
- [Data Server Portal](#)
- [Group Manager](#)
- [Profile System](#)
- [Pipeline II](#)

Each project is built with Maven, and therefore has its own automatically generated web site. All of the web site are published here:

<http://glast-ground.slac.stanford.edu/docs/>
