Addendum to the report (Len Moss)

Here's the final version of the Recharge Spreadsheet for the period beginning 1 Jul 2011. It has the following small tweaks.

- 1) Removed the four freia machines (SSRL). Due to a miscommunication these were not decommissioned last April. I will see to it that a decommission ticket is opened.
- 2) Removed psrepo (LCLS). The current incarnation has been managed by PCDS staff.
- 3) Reclassified three build machines, bldmac01-02 and bldsol02, as part of a shared batch build service.
