New PingER developers

Getting a SLAC computer account

1. You will need a SLAC computer account. To get this you will first need a SLAC ID (SID). You would be a SLAC user (see http://www-group.slac.stanford.edu/ocfo/sid_entry.htm) and will need to submit the form at https://oraweb4.slac.stanford.edu/apex/oradb1/f?p=134 (right now I can't access this form). After you have the SID then you can apply for a SLAC computer account.

Access Priviledges etc
