GlastRelease v15r50p5

System Tests Report Summary

No differences for comparison with baseline release, GR v15r50.
This is the first serious release candidate on the branch for developing the event digi overlays.

Changes

- Overlay, OverlayRootData, OverlayEvent - new packages added to handle merging of digi information from data events sampled in McIlwain L
- GlastSvc, Gleam - updates to use overlay package
- RootIO - digi merging, memory leak fixed
- LdfEvent - method to set tkrVector
- Trigger - merging of tkrVector
- TkrUtil
- TkrDigi, CalDigi, AcdDigi, Event - digi merging moved from these to overlay package
