

SLAC Network History

SLAC Network

[SLAC Network Announcements](#)

[SLAC's Off site bandwidth capacity 1983-2017](#)

[Upgrade to SLAC core network March 2017.](#)

[OCIO Senior management update, Oct 2015](#)

[SLAC network top level page 1993-2012](#)

[SLAC Computing Highlights](#), by Les Cottrell, after dinner talk to Silicon Valley Tour group, May 2011

[Networking Restropective](#), Les Cottrell, presentation at 2011 HEPiX meeting

[The Internet: where did it come from, what are the challenges?](#) Les Cottrell, talk given at Helwan University in Cairo Egypt, 2010

[Network Case Studies 2000-2008](#)

[SLAC Network Architecture, 2007](#)

[SLAC network diagrams 2004](#)

[SLAC network diagrams 2003](#)

[SLAC switched network 2000](#)

[SLAC LAN/WAN description 1999](#)

[SLAC LAN size 1999](#)

[SLAC networking 1999](#)

[SLAC switched network 1999](#)

[SLAC network connectivity 1998](#)

[SLAC switched network 1997](#)

[The Internet and SLAC 1997](#)

[SLAC's HEP Internet Monitoring 1997.](#)

[SLAC switched network 1996](#)

[SLAC WAN 1995](#)

[SLAC Structured Wiring Plan, 1994](#)

[SLAC Server MIPS 1991-1993](#)

[SLAC Workstation purchases 1982-1983](#)

[SLAC-Stanford micro-wave link 1991](#)

[SLAC Data Center: Jan 1990, April 1991](#)

[BARRNET 1990](#)

[SLAC LAN 1989](#)

[SLAC Terminal use 1975-1995](#)

Some diagrams of the network are shown below. By 2003 it was no longer possible to show the network in a single drawing.

SLAC WAN 1995	SLAC LAN 1996	SLAC LAN 1997

- [Foundation of HEPiX 1991](#), proposal presented by Les Cottrell, see last slide
- [Future of Intersite Networking](#), Oct 1986 LBL, copies of viewgraphs etc presented at workshop, includes overview of multiple networks including BITNET (SLAC first national Lab Bitnet node 1983). 368 pages
- [HEPnet 1985](#), slide created from a DEC network management tool called NMCC that shows HEPnet. Just for orientation, FNAL is in the center, SLAC is out to the left, CalTech is below SLAC, with BNL, LBL, and ANL just sort of single points. There's also a number of universities attached, mostly to FNAL. This was just about the time that HEPnet began to act as a network, and not just a bunch of individual network connections directly to the experiment location a university was involved with. The links, of course, were all 9.6 or 4.8kb/s, and the network design was cobbled (vs architected...). But it was one of the earliest really distributed networks (I think Bitnet & Milnet were the only other ones around at that point...). Phil Demar.
