

# Annotated Terminal Session 1

## Compilation Session 1

```
tersk> ls
-rw-r--r--  1 marndt gl      6554 Mar  4  2004
file1
1  -rw-r--r--  1 marndt gl      631 Feb 25  2004
file2
-rw-r--r--  1 marndt gl      194 Feb 21  2004
file3
-rw-r--r--  1 marndt gl      10 Feb 21  2004
file4
2  tersk> rptdump --option1 --option2 arg input
output 2>&1
3  tersk> cat file2
4  tersk> rptconfig --ifile file2
```

**Note 1:** file2 is the item of interest in this directory listing

**Note 2:** Now issue the rptdump command

By design, rptdump is blithely ignorant of XYZ. So be aware when executing this command.

**Note 3:** Dump and review the contents of file2 (output not shown)

**Note 4:** Process the dump with rptconfig to set options
