

01.16.2015 Meeting

a) Target design modification [2015-01-16Target.pptx](#)

b) SVT Collimator modification [Collimator Gap.pptx](#)

Conclusions:

1) The width of the macor plate will be reduce by a few mm, making the width of the target to about 25 mm.

Since the macor material is 10x thicker than the Al frame used during the Dec run, study will continue to evaluate its effect.

2) The 2 mm gap will be increased to 4 mm
