```

```

-----
Libraries have been installed in:
    /tmp/dbxml-2.2.13/install/lib

```

If you ever happen to want to link against installed libraries in a given directory, LIBDIR, you must either use libtool, and specify the full pathname of the library, or use the '-LLIBDIR' flag during linking and do at least one of the following:

- add LIBDIR to the 'LD_LIBRARY_PATH' environment variable during execution
- add LIBDIR to the 'LD_RUN_PATH' environment variable during linking
- use the '-Wl,--rpath -Wl,LIBDIR' linker flag
- have your system administrator add LIBDIR to '/etc/ld.so.conf'

See any operating system documentation about shared libraries for more information, such as the ld(1) and ld.so(8) manual pages.

```

Having build problems?
Read instructions at <http://xml.apache.org/xerces-c/build.html>
Still cannot resolve it?
Find out if someone else had the same problem before.
Go to <http://marc.theaimsgroup.com/?l=xerces-c-dev>

In future, you may also directly type the following commands to create the Makefiles.

```
export TRANSCODER="NATIVE"
export MESSAGELOADER="INMEM"
export NETACCESSOR="Socket"
export THREADS="pthread"
export BITSTOBUILD="32"
export CC="gcc"
export CXX="g++"
export CXXFLAGS=" -w -O -DNDEBUG -DPROJ_XMLPARSER -DPROJ_XMLUTIL -DPROJ_PARSERS -DPROJ_SAX4C -DPROJ_SAX2 -
DPROJ_DOM -DPROJ_DEPRECATED_DOM -DPROJ_VALIDATORS -DXML_USE_NATIVE_TRANSCODER -DXML_USE_INMEM_MESSAGELOADER -
DXML_USE_PTHREADS -DXML_USE_NETACCESSOR_SOCKET "
export CFLAGS=" -w -O -DNDEBUG -DPROJ_XMLPARSER -DPROJ_XMLUTIL -DPROJ_PARSERS -DPROJ_SAX4C -DPROJ_SAX2 -
DPROJ_DOM -DPROJ_DEPRECATED_DOM -DPROJ_VALIDATORS -DXML_USE_NATIVE_TRANSCODER -DXML_USE_INMEM_MESSAGELOADER -
DXML_USE_PTHREADS -DXML_USE_NETACCESSOR_SOCKET "
export LDFLAGS=" "
export LIBS=" -lpthread "
configure --prefix=/tmp/dbxml-2.2.13/install
```

If the result of the above commands look OK to you, go to the directory
/tmp/dbxml-2.2.13/xerces-c-src/src/xercesc and type "gmake" to make the XERCES-C system.

-----
Libraries have been installed in:
    /tmp/dbxml-2.2.13/install/lib

If you ever happen to want to link against installed libraries
in a given directory, LIBDIR, you must either use libtool, and
specify the full pathname of the library, or use the '-LLIBDIR'
flag during linking and do at least one of the following:
- add LIBDIR to the 'LD_LIBRARY_PATH' environment variable
  during execution
- add LIBDIR to the 'LD_RUN_PATH' environment variable
  during linking
- use the '-Wl,--rpath -Wl,LIBDIR' linker flag
- have your system administrator add LIBDIR to '/etc/ld.so.conf'

See any operating system documentation about shared libraries for
more information, such as the ld(1) and ld.so(8) manual pages.
