

20151029 SLAC meeting

Attendees

Yee, Mayank, Bebo, Jacek, Vaikunth, Les

Purpose

This is to go over the next step for engaging the Indian students. There is documentation at: <https://confluence.slac.stanford.edu/display/IEPM/Indian+Students+2016>

I suspect we need to flesh out a bit what projects the students may be engaged in, who will mentor/supervise them, what skills will be needed etc. Following this we will probably need to engage with the powers that be in India to get an update on details (when do they get degrees, do any have a visa, once they have a degree are they still interested in coming, what is the duration of the stay at SLAC, what about the existing BS students, how should we proceed). Following this I am thinking we will need to set up Skype one on one meetings with them to share what we propose, learn their skills, plans and suitability etc.

Questions:

Before graduate they collaborate remotely, send questions to Sai Sabitha Associate prof of CSE

- When do they graduate, August?
- If no visa will they come after they graduate
- What about Post docs
- Will they be able to continue work after 3 months. Will have to go back to complete
- Try skype with video, blue jeans, voice on landline, video
- When they say Android how fixed are they

Update what we want: Mayank, Jacek, Les including PingER on Android (paper on RPi)

30 min Skype meeting to get to know meet & greet, do 2 or 3 as subsets

Light technical discussion

What are their interests?

Hundreds of nodes, analyzing LSST empirical nodes

Let Jennifer know of space needs (innovation room)

Need hosts will they bring laptops, on visitor

Simulated mysql tests

Set up chat room Amity-collaboration, suggested name slacamity – Yee, Les

Smile.stanford.edu - Mayank
