

SVN

How to Access

For read/write access you will need to supply your SLAC unix password (contact cpo if you need read/write access to a repository):

```
svn co svn+ssh://<username>@suncatls1.slac.stanford.edu/<packagename>/trunk <packagename>
```

NOTE: Replace <packagename> and <username> above with the appropriate values.

For readonly access (no password required):

```
svn co svn://suncatls1.slac.stanford.edu/<packagename>/trunk <packagename>
```

List of SUNCAT SVN Packages

- kinetics
- libxc-gpu
- hori
- beef
- batch

Espresso

Johannes Voss' modified Quantum Espresso has been migrated to github. The ASE interface can be downloaded with

```
git clone https://github.com/vossjo/ase-espresso
```

while instructions for installing the fortran code can be found in Johannes' wiki:

<https://github.com/vossjo/ase-espresso/wiki>
