

Display Shelf IP Info

Usage is: delete_shelf_ip_info --shelf <shelf_ip> [OPTIONS]

Required arguments:

-s, --shelf=SHELF_IP IP address of shelf with FRU info to set

Optional arguments:

When specified w/o parameters, the optional arguments will assume their default values. When omitted, the values present in the Shelf FRU Information will be retained.

-r, --raw Prints out raw Shelf IP Info

-m, --mr-area Prints out raw MultiRecord Area

-v, --verbose=VERBOSITY VERBOSITY can range from 1 to 3.

Return Value:

0 if OK

1 if there is a problem with the arguments provided

2 if there are problems communicating with the shelf
