

Make RCE SD Card

Usage: `sudo mkrcesd <device> <dpm|dtm>`

Format and populate an RCE SD card (must be run as sudo).

Options:

`[--mac mac-address] [--sdkroot path-to-sdks] [--archlinux path-to-archlinux]`
`[--bootos <rtems|linux|rdisk>]`

Examples:

```
sudo mkrcesd sdd dpm (format SD at /dev/sdd for dpm, use default sdkroot and archlinux, default boot OS)
sudo mkrcesd sdf dtm --mac 08:00:56:00:ff:ff (set mac)
sudo mkrcesd sdd dpm --sdkroot /my_path_to_sdks (override default sdkroot)
sudo mkrcesd sdd dpm --bootos linux (set boot OS linux)
```
