

Checkout2 Likelihood analysis

Likelihood analysis for the science tools checkout

The tools in this area are **gtlikelihood**, **gtcntsmap**, **gtdiffresp**, **gtexpmap**, **gtlivetimecube**, **gtpsfc**, **gtsrcmaps**, and **gttsmap**. Most of the tools are essentially helper applications for **gtlikelihood**. The utility **viewCuts** is also available for examining the DSS keywords in a FITS file.

Short summaries of the science tools and links to the available documentation are on the [tools summaries page](#).
