

# Where can I report bugs in SLIC

SLIC has a [Jira bug tracker](#) where bugs can be reported, if you are an LCD software developer with a login there. Otherwise, simply send an email to [Jere my McCormick](#), and the bug will be entered into the database. You will receive a reply with the URL of the item. You can attach files and make comments at this URL.

## Jira Account

If you doing LCD software development, then you should get an account on the [SLAC Jira](#). (Jira is an excellent bug tracking system.) Email [Tony Johnson](#) to obtain an account.
