

Detector Conditions Tags

Overview

Conditions tags limit the available conditions records that may be used within a job. Only those conditions records belonging to the tag will be available to be loaded, and others will be filtered out.

Available Tags

The following production tags are available.

tag	run start	run end	description
test_run_2014_calib	1	1365	known good calibrations for Test Run 2014
eng_run_2015_calib	4441	5967	know good calibrations for Engineering Run 2015
phys_run_2016_calib	7219	8100	know good calibrations for Physics Run 2016
L0_mc_calib	1000000	1000000	MC calibrations for L0 detector studies

Activating Tags

Conditions tags can be activated in the job manager using the following command line syntax.

```
java -jar hps-distribution-bin.jar -t tag_name [args]
```

The syntax when running the EvioToLcio tool is similar.

```
java -cp hps-distribution-bin.jar org.hps.evio.EvioToLcio -t tag_name
```
