

Conda Science Tools

(very preliminary test)

Install

```
# Get anaconda or miniconda on your own, then:
> conda create --name st_test -c conda-forge python=2

# Do not activate the environment yet, do this first:
> conda install --name st_test -c conda-forge -c fermi_dev_externals numpy scipy ipython fermitools

# Now you can activate
> source activate st_test
```

Known issues

- ☒ The MINUIT minimizer does not work. It crashes with this message: (Solved)

```
startio: illegal unit number
apparent state: unit 6 Segmentation fault (core dumped)
```
