

# Using bbcp or bbftp

## bbftp

The file /scratch/test/prod/f.root at a local site should be transferred to slac with name /scratch/glast/f.root.

```
bbftp -e 'lcd scratch/test/prod; cd /scratch/glast; put f.root' -V -E /afs/slac.stanford.edu/public/software/bbftp/bin/bbftpd -u glast -p 1 glastlnx22.slac.stanford.edu
```
