

How do I build GDML

The following commands will install GDML 2.8.0 static libraries on your system.

```
wget http://service-spi.web.cern.ch/service-spi/app/releases/GDML/downloads/GDML_2_8_0.tar.gz
tar -zxvf GDML_2_8_0.tar.gz
cd GDML2/CPPGDML
./configure --with-geant4=/path/to/geant4 --with-xercesc=/path/to/xercesc --with-clhep=/path/to/clhep --prefix=
/path/to/install/dir --enable-shared=no
make
make install
```
