Ubuntu Desktop testing progress

There are two Ubuntu 16.04 Desktop test boxes being used by SUIT:

1. Jacob Demo
   PC86881
   IP: 134.79.68.12
   HWADDR: 78:2b:cb:b3:c2:a2

2. Franklin Pham
   PC89158
   IPADDRR 134.79.68.110
   HWADDR d4:be:d9:2f: 0e:2a

- Both the above desktops have been installed with Ubuntu 16.04 and have been Cheffed using:

  ```
  curl yum.slac.stanford.edu/go-chef | sudo /bin/sh
  ```

- After Karl has added AD authentication to Chef, these hosts can be reinstalled and Chef can be bootstrapped again for testing.

  Before reinstalling, the desktops should be unregistered with the chef server using:

  ```
  curl yum.slac.stanford.edu/ungo-chef | sudo /bin/sh
  ```

There are two CentOS 7 desktop test boxes used by SUIT:
