

ISOC to FSSC Transition Master Document List

This page is designed to be a master Table to Contents to point to current and relevant documentation related to the systems and software transitioning to the FSSC from the ISOC. Feel free to add relevant documentation as you find/create it. Most of the initial entries were gleaned from the software week meeting notes.

Contents:

- [Transition Overview/Management Documents](#)
 - [Software Week Agenda/Notes](#)
 - [Mission Planning/Flight Operations](#)
 - [ISOC Software and Tasks](#)
 - [General](#)
 - [Specific Software or Tasks](#)
 - [Archiving](#)
 - [Fastcopy](#)
 - [Half Pipe & Level 1 Processing](#)
 - [ASP](#)
 - [Fermitools](#)
 - [Release Management \(Jenkins\)](#)
-

Transition Overview/Management Documents

- [10 Yr Software Transition Dashboard](#) - list tracking open issues
- [SLAC to FSSC transition questions](#) - unresolved questions
- [Software Master List](#)

Software Week Agenda/Notes

- [Fermi Software Week Winter 2017](#)
 - [Software Week Meeting notes](#)
- [Fermi Software Week Fall 2017](#)
 - [Software Week Fall 2017 Meeting Notes](#)
- [Fermi Software Week Winter 2018](#)
 - [Notes](#) - These are just the live notes on Google docs

Mission Planning/Flight Operations

- [Routine Flight Operations Tasks](#)
- [Non-Routine Flight Operations Tasks](#)
- [Mission Planning](#)

ISOC Software and Tasks

General

- [Regular and semi-regular manual ISOC tasks](#)
- [ISOC software summary](#)
- [How-To-Fix page](#) - We should make sure this information on this page is correct and add things, as needed.
- [ISOC SVN Repository Information](#) - We need to determine who is/will be responsible for the various packages.

Specific Software or Tasks

- [Skimmer at Slac](#)
- [LogWatcher](#) - Updated by Don to add information about handling errors reported by LogWatcher.

Archiving

- [FASTCopy and Level-0 Archiving How-To](#) - Created by Don to capture the archiving procedures.
- [astore reference](#)

Fastcopy

- [FASTCopy processing chain](#)
- [HTF FC Incoming](#)

Half Pipe & Level 1 Processing

- [Pipeline II User's Guide](#) - A good starting point for understanding the general organization of the pipeline and the tools needed to track down problems.
- [Things to know while on-call for Data Processing](#)
- [Pipeline errors and solutions](#) - This is a page collecting recently encountered errors and how they were fixed.
- [LAT calibrations](#)
 - [Updating L1 calibrations](#)
- [How to shutdown and restart the pipeline server](#)
- [How to update the alarm limits in L1](#)
- [Reprocessing Instructions](#)

ASP

- [Leap Second Adjustments](#)
- [New DRP sources based on ATels](#)
- Initial note from Jim about how to handle ASP: <http://glast.stanford.edu/cgi-bin/viewcvs/users/jchiang/ASP/>

Fermitools

- [10 Yr Software Transition Dashboard](#)
- [Fermitools Github Repository](#)
- [Fermitools Azure Pipeline](#)

Release Management (Jenkins)

- [Top level developer documentation](#)
- [Workflow description](#)
- [The SCONS build system](#)
- [Using repoman](#)
