Posting to Trigger web and mailing list

Posting to the trigger mailing list: E-mail **triggerlist@glast.stanford.edu**
and the archive can be browsed at http://www-glast.stanford.edu/protected/mail/trigger/

The confluence space hosting the web page is fairly limited so that we are expected to only use it as the main hub hosting the web page while the bulk material such as plots and talks should be put on to the trigger web auxilliary space and linked into the web with url.

The designated trigger web auxilliary space is
http://www.slac.stanford.edu/exp/glast/trigger/
which is also accessible through AFS:
/afs/slac/www/exp/glast/trigger/
The meetings/yymmdd/ directories are standard areas for trigger meeting materials. While you can also create adirectory under your username to add other interesting stuff for the web.
