

Perl XML 501 Protocol Scheme Error

Problem:

Running XML parsers on xml files with the following DOCTYPE definitions results in a scheme error.

```
<!DOCTYPE configuration [  
<!ENTITY include SYSTEM "generic.xml">  

```

```
501 Protocol scheme 'file' is not supported file:///afs/slac.stanford.edu/u/sf/ytl/work/SNMP/lan-monitoring  
/branches/xml-based-dispatcher/conf/devices/generic.xml  
Handler couldn't resolve external entity at line 8, column 0, byte 108  
error in processing external entity reference at line 8, column 0, byte 108:
```

```
<configuration>  
&include;  
^  
  
<remap>  
  at /usr/local/lib/perl5/site_perl/5.8.8/i686-linux-thread-multi/XML/Parser.pm line 187
```

Solution:

Install the following perl modules:

```
HTML::Tagset  
HTML::Parser
```
