

PingER and Covid-19 for the Balkan states

The big hitter is Albania. Albania interventions (see https://en.wikipedia.org/wiki/COVID-19_pandemic_in_Albania) include:

Mar 18 1st two cases, halted all schools, canceled all large public gatherings and asked sports federations to cancel scheduled matches; Mar 10 lockdown bars, restaurants, gyms, discos, and venues with live music ordered closed; Mar 11 all sermons, prayers and mosques canceled; 70 checkpoints set up to ensure people comply with self quarantine; Mar 13 hardening of lockdown; Mar 15 K-12 instruction moved outside, all museums, cinemas, theatres and public parks closed; Mar 16 emergency legislation social, cultural and public gatherings banned, curfew from 18:00 onwards. Mar 23 > 100 cases.

Balkans ping IPDV seen from SLAC

When one removes Albania the chart is as below:

There is a hint that Croatia IPDV may have dropped towards the end of March.

Bosnia Herzegovina has a spike 3/11/2020 possibly associated with the shutting down of schools and universities. Mar 5 first 2 cases; Mar 11 shutdown schools and universities; Mar 18 ban public gatherings, all eating facilities, beauty salons, coffee bars, discos, tea shops, cafes, final exams for primary and secondary education canceled; Mar 21 first death, curfew 18:00-05:00.

Serbia and Montenegro has peaks Mar 16, Mar 27-30 and Apr 6. Mar 17 curfew 20:00-05:00 introduced and people over 65 cannot leave residence at any time, Mar 28 curfew extended to start at 15:00 at weekends
