

06.08.2020 EC

Present: John, Rafo, Stepan, Marzio, Andrea, Norman, Cameron, Tim, Matt G.

- News
Today was the first day for JLAB essential people to be back. The tier-1 personal will start on Wednesday. SLAC identified several projects in fundamental research as essential and allows people on-site. HPS is not one of them, but this will not affect our plans. The production line for SVT sensors in Spain is now up and running.
- Update on 2016 analysis, a path for releasing the data - Matt G.
 - Unblinding for Vertexing analysis, L1L1 - Andrea, committee report
The review committee will work with Matt S. on a few minor issues in order to unblind L1L1 only
 - Resonance Search, finishing the analysis - Omar/Rafo/Cameron
Report to the review committee will go tomorrow and the committee agreed to answer by end of the week. The updated note will have an estimate of systematics.
- Status of 2019 MC and calibration - Marzio/Norman/MattG./Omar
- Reach estimate for 2019 (4.5 GeV)/2021 (3.8 GeV)/2.2 GeV - Cameron/Matt G./Omar
Still evaluating integrated charge for data and running new MC with looser trigger cut and random triggers to understand the rate discrepancy between data and MC.
- [Update on PAC and the jeopardy document](#) - Stepan
