# Focus discussion 2021-9-22
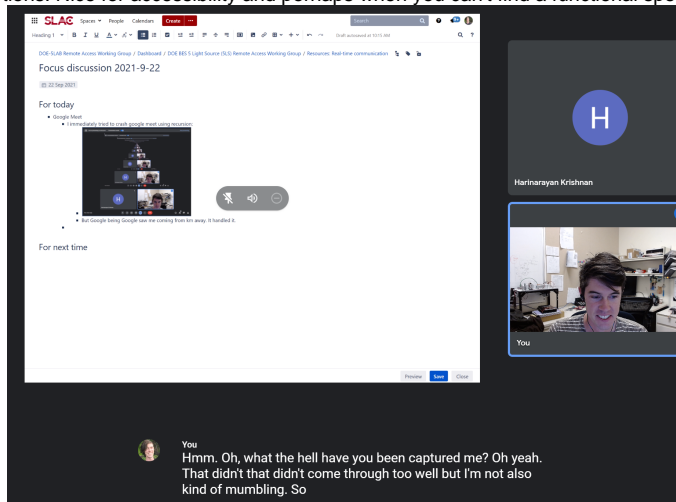

22 Sep 2021

For today

- Google Meet
  - I immediately tried to crash google meet using recursion:

  - But Google being Google saw me coming from km away. It handled it.
  - Ooo captions. Nice for accessibility and perhaps when you can't find a functional speaker output.

  - Google meet appears to have a way to easily integrate a realwear hmt-1, I'll have to try this.
  - Hand raises come with a tone which is nice
  - How do the permissions for joining the meet work?
  - We'll end it here and pick it up next week.

For next time
