

# Request to update DQM alarms limits in L1proc (AlarmsCfg-07-00-29)

## Reason for change:

We request to deploy datamonitoring/AlarmsCfg-07-00-29. In this new tag we updated the limits on the DQM quantity Lac\_Thresholds\_FacePos\_TH1\_TowerCalLayerCalColumn\_13\_1\_1.

A more detailed description can be found in the last section of this page.

## Test Procedure:

This version of AlarmsCfg has been tested processing locally the monitoring products from 2 LPA runs ( 660508065, 660440311)

## Rollback procedure:

The package can be rolled back to the previous version by flipping a soft link. Also note that the package is completely independent from any other package running in the pipeline and will not cause a version change of L1Proc.

## CCB JIRA:

SSC-449 - Jira project doesn't exist or you don't have permission to view it.

## Details:

Relaxing alarm limits on Lac\_Thresholds\_FacePos\_TH1\_TowerCalLayerCalColumn\_13\_1\_1:  
upper warning limit changed from 2.95 to 3.5, upper error limit from 3 to 4
